

The new DT400B is for the serious trail rider who likes to take his motorcycle for a casual ride along the highway.

The new DT400B is for the commuter who likes to take his motor cycle for a casual jaunt along the open countryside.

It has a motorcycle-type frame with a low center of gravity. Plus motorcycle forks and rear shocks. These Thermal-Phase rear shocks are designed not to overheat or lose damping efficiency. The DT400B has the perfect position for dual purpose riding.

The engine has the power you need to reach highway speeds.

And the low end putting power you need for hills, mudholes and most off-road riding situations. (This low end power is achieved through Yamaha's exclusive "torque induction" reed valve intake system.)

The DT400B is also equipped with C.D. ignition that eliminates the points and condenser, so you'll have a dependable machine requiring less maintenance.

The new DT400B. It's a trail machine built for the road.

And vice versa.
