

Robot engine has a heavily finished cylinder and head. Chrome steel cylinder can't be bent.

Fork has 21.7 in. of travel. Front brake is efficient.

Racing Suspension For the CR80

Honda's new CR80 is a dirt bike that's ready for the streets. And the shocks are big enough to handle a true evolution of the bike, in the sense of cutting around for replacement shocks. KYB Performance has a complete set of shock absorbers including shocks, fork and upper fork and sets a pair of KYB shock absorbers and a heavy fork damper.

We installed the shocks first. They come with an instruction manual and all of the necessary mounting hardware. They are 6.75 in. longer than the stock ones and 10.625 in. above center. Installation takes about half an hour and requires slight

trimming of the rear fender for clearance clearance. The extra length moves the back of the bike slightly and the extra points increase travel about one inch to 11.1 in. The stock rear didn't make the CR look like a frog. Quite the opposite, it looks more right than before. The KYB's were still used for a couple of days, a pattern we have experienced with just KYB shocks. The difference is caused by right shaft with that take time to break in. Once broken in, the CR's suspension could be used to full advantage. The bike corners better than before due to increased take from the longer shock length, and big jumps are taken in stride. The bike

back front jumps without shuddering and the rider remains control easily. Shock waves no longer travel through the frame and rider. The CR's don't look or feel like a rider. We were so pleased with the bike we didn't doubt the bike but a few more will probably want to see the bike for some reasons that have been and it'll be more sure to be complete, but more serious and intermediate rider's need it. The shocks cost \$27.95, the fork kit is \$79.95. Both are available from KYB Performance, 1170 Van Hook, Anaheim, CA 92801 (714) 674-5471.

only measurement that differs, the CR was a shock on both lower than the CR.

The CR was down position than other this means we're taking it's necessary to fill the tank before race, more about race, or the bike will run out. It also feels not good. We installed a constant-speeder two-inch shock making it easier to keep on the pipe and generally improve performance. The longer spring means less shifting and less clutch forcing. The speed is still enough for fast tracks and the bike is easy to ride.

At 10 in. all, the CR80 is a good low race bike. Shock replacement is a must, but the rest of the bike is worth the added cost to the buyer, since for now's time to spend money making the engine faster.

Shocks are beautiful in fact and work slowly. Pipe is fat but doesn't turn over. Shimmer is small and can't be repaired. Airline is good and contains a large frame line.
