web mar 10 2023 what is laser beam machining contents show laser beam machining is a non conventional machining process in which a laser is directed toward the workpiece for machining this process uses thermal energy to remove metal from metallic or nonmetallic surfaces the laser is electromagnetic radiation

pdf laser machining researchgate - Mar 02 2023

web oct 7 2020 laser beam machining lbm is one of the advanced non contact machining processes that employ monochromatic light with high frequency for machining using thermal energy the highly energized

laser machining process an overview sciencedirect topics - Jul 26 2022

web laser beam machining is widely used for various material removal applications since it provides highly concentrated energy source to cut the materials in laser through cutting a kerf is created through relative motion between the laser beam and the workpiece surface while profiling 26
