

Installation Requirements

Boat Construction

1. Fasten "Postboard" to hull using Minimum 1/4" x 1/4" Stainless Bolts.
2. Fasten "Supporter" to the "Postboard" using 1/4" x 1/4" x 1/4" Stainless Bolts. The "Supporter" should be installed in the "Postboard" in a "T" shape.
3. Fasten "Water Pickup" to the "Supporter" using 1/4" x 1/4" x 1/4" Stainless Bolts.
4. Fasten "Water Pickup" to the "Supporter" using 1/4" x 1/4" x 1/4" Stainless Bolts.
5. Fasten "Water Pickup" to the "Supporter" using 1/4" x 1/4" x 1/4" Stainless Bolts.
6. Fasten "Water Pickup" to the "Supporter" using 1/4" x 1/4" x 1/4" Stainless Bolts.

NOTE: For Water Pickup Installation, see the "Water Pickup" section of the "Mar/Cruiser" manual.

IMPORTANT: All applicable Coast Guard regulations must be complied with when constructing engine compartment.

Water Pickup(s)

⚠ CAUTION

Do not install water pickup directly in line with propeller, as pickup may create turbulence and allow air to flow into the "propeller slipstream." This will cause propeller ventilation and will adversely affect boat performance.

A "T" or "Y" type water pickup must be used with this stern drive. Water pickup must be large enough to permit sufficient water flow to engine and water pickup pump for adequate engine cooling. Pickup also must supply a positive head while underway. We recommend Quicksilver "Y" and "T" type or "Y" or "T" type "Mar/Cruiser" Water Pickup.

Water pickup should be installed in an easily accessible location, where it can be removed and cleaned of water and debris when boat is outboard. Water pickup should be installed in accordance with instructions about stern drive. Quicksilver water pickup is recommended water pickup 1/4" x 1/4" x 1/4" (3/8") 3/8" of stainless steel and fastener to provide a flow of water to the pump. We recommend the use of wire mesh or mesh to prevent debris from entering the pump. Be sure to secure these connections with hose clamps.

It is recommended that a water shut valve be installed in water intake hose to allow the operator to shut off the water in case of a leak or when boat is not in use. The water shut valve also is required if operator intends to flush or drain the cooling system while the boat is in the water. Valve must have an internal water seal, which is equal to or greater than water resistance to one inch restricting water flow during normal operation. It is 1/4" x 1/4" x 1/4" (3/8") or larger brass ball valve or gate valve is recommended. Ball valve is an area where it can be easily accessible and supported adequately to prevent hose fatigue. After installation, valve and connections should be carefully inspected for leaks.

IMPORTANT: Damage, that results from a clogged cooling system, will not be covered by Mar/Cruiser Warranty.

If boat is to be operated in water with a high debris content, a debris strainer should be installed in water intake hose to prevent debris from entering cooling system. Strainer must be of sufficient size to ensure that an adequate supply of water is maintained for engine cooling. Install debris strainer in an area where it will be easily accessible for inspection and cleaning, according to manufacturer's instructions. Strainer should be installed in water intake hose after water shut valve to allow operator to shut off water when cleaning strainer.

Power Trim Control

⚠ CAUTION

Avoid possible severe damage to the stern drive. Do not trim drive all the way up or at an engine speed above 1200 RPM.

Any of the Quicksilver "Y" or "T" type trim systems that are specified for use with Mar/Cruiser stern drive can be used with this Power Trim system. Install trim system in accordance with instructions for that system.

Deep Space Probes Gregory L. Matloff, 2006-08-31. The Space Age is nearly 50 years old but exploration of the outer planets and beyond has only just begun. *Deep Space Probes* Second Edition draws on the latest research to explain why we should explore beyond the edge of the Solar System and how we can build highly sophisticated robot spacecraft to make the journey. Many technical problems remain to be solved among them: propulsion systems to permit far higher velocities and technologies to build vehicles a fraction of the size of today's spacecraft. Beyond the range of effective radio control, robot vehicles for exploring deep space will need to be intelligent thinking craft able to make vital decisions entirely on their own. Gregory Matloff also looks at the possibility for human travel into interstellar space and some of the immense problems that such journeys would entail. This second edition includes an entirely new chapter on holographic message plaques for future interstellar probes, a NASA funded project.

Fungicides Odile Carisse, 2010-12-14. Plant and plant products are affected by a large number of plant pathogens among which fungal pathogens. These diseases play a major role in the current deficit of food supply worldwide. Various control strategies were developed to reduce the negative effects of diseases on food fiber and forest crops products. For the past fifty years fungicides have played a major role in the increased productivity of several

crops in most parts of the world Although fungicide treatments are a key component of disease management the emergence of resistance their introduction into the environment and their toxic effect on human animal non target microorganisms and beneficial organisms has become an important factor in limiting the durability of fungicide effectiveness and usefulness This book contains 25 chapters on various aspects of fungicide science from efficacy to resistance toxicology and development of new fungicides that provides a comprehensive and authoritative account for the role of fungicides in modern agriculture
