Marine Renewable Energy Technology and Environmental Interactions Mark A. Shields,Andrew I.L. Payne,2014-02-12 It is now widely recognized that there is a need for long term secure and suitable sustainable forms of energy Renewable energy from the marine environment in particular renewable energy from tidal currents wave and wind can help achieve a sustainable energy future Our understanding of environmental impacts and suitable mitigation methods associated with extracting renewable energy from the marine environment is improving all the time and it is essential that we be able to distinguish between natural and anthropocentric drivers and impacts An overview of current understanding of the

environmental implications of marine renewable energy technology is provided **Science from Sight to Insight** Alan G. Gross, Joseph E. Harmon, 2013-11-25 John Dalton's molecular structures Scatter plots and geometric diagrams Watson and Crick's double helix The way in which scientists understand the world and the key concepts that explain it is undeniably bound up in not only words but images Moreover from PowerPoint presentations to articles in academic journals scientific communication routinely relies on the relationship between words and pictures In *Science from Sight to Insight* Alan G. Gross and Joseph E. Harmon present a short history of the scientific visual and then formulate a theory about the interaction between the visual and textual With great insight and admirable rigor the authors argue that scientific meaning itself comes from the complex interplay between the verbal and the visual in the form of graphs diagrams maps drawings and photographs The authors use a variety of tools to probe the nature of scientific images from Heidegger's philosophy of science to Peirce's semiotics of visual communication Their synthesis of these elements offers readers an examination of scientific visuals at a much deeper and more meaningful level than ever before
