Anatomy of the Nervous System Olof Larsell, 1951 *New Age Journal*, 1997 **Science and Religion in Mamluk Egypt** Nahyan Fancy, 2013-06-03

The discovery of the pulmonary transit of blood was a ground breaking discovery in the history of the life sciences and a prerequisite for William Harvey's fully developed theory of blood circulation three centuries later. This book is the first attempt at understanding Ibn al Naf's anatomical discovery from within the medical and theological works of this thirteenth century physician jurist and his broader social, religious, and intellectual contexts. Although Ibn al Naf's did not posit a theory of blood circulation, he nevertheless challenged the reigning Galenic and Avicennian physiological theories and the then prevailing anatomical understandings of the heart. Far from being a happy guess, Ibn al Naf's anatomical result is rooted in an extensive re-evaluation of the reigning medical theories. Moreover, this book shows that Ibn al Naf's re-evaluation is itself a result of his engagement with post-Avicennian debates on the relationship between reason and revelation and the rationality of traditionalist beliefs such as bodily resurrection. Breaking new ground by showing how medicine, philosophy, and theology were intertwined in the intellectual fabric of pre-modern Islamic societies, *Science and Religion in Mamluk Egypt* will be of interest to students and scholars of the History of Science, the History of Medicine, and Islamic Studies.
