Ancold Dam Safety Management Guidelines:

Regulatory Frameworks for Dam Safety Daniel D. Bradlow, Alessandro Palmieri, Salman M. A. Salman, 2002-10-01

Regulatory Frameworks for Dam Safety was conceived and prepared in response to growing concern over the safety of dams. Given the large number of dams around the world, the safe operation of dams has significant social, economic, and environmental relevance. A dam failure can result in extremely adverse impacts, including a large-scale loss of human life. For countries with large stocks of dams, the issue of dam safety is critical. The book examines the dam safety regulatory frameworks of 22 countries. It draws comparisons and highlights similarities among the various systems. Most importantly, it identifies essential elements, desirable features, and emerging trends for dam safety regulatory frameworks. The authors are leading experts in their fields. Daniel Bradlow is professor and director of the International Legal Studies Program at the Washington College of Law at American University and was a consultant to the World Commission on Dams. Alessandro Palmieri is Lead Dam Specialist in the Quality Assurance and Compliance Unit of the Environmentally and Socially Sustainable Development Vice Presidency at the World Bank. Salman M. A. Salman is Lead Counsel in the Environmentally and Socially Sustainable Development and International Law Group of the World Bank's Legal Vice Presidency and has published extensively in the area of water law.

Regulation of Dam Safety: An Overview of Current Practices Worldwide / Reglementation de la Sécurité des Barrages: Revue Internationale des Pratiques Actuelles CIGB ICOLD, 2025-03-18 ICOLD Bulletin 167. Regulation of Dam Safety: An Overview of Current Practices Worldwide provides a comprehensive review of legal and regulatory arrangements for the safety of dams among the countries represented at ICOLD. As such, this review is essentially a snapshot of the situation being in place at the end of the first and the beginning of the second decade in the 21st century. This Bulletin is useful not only to these countries which have weak or non-existent legal and regulatory dam safety frameworks but also to those jurisdictions which are considering changes and improvements to existing legislation and regulations. Le Bulletin 167 de la CIGB Reglementation de la Sécurité des Barrages Revue Internationale des Pratiques Actuelles fournit une revue complète des dispositions légales et réglementaires en matière de sécurité des barrages au sein de pays représentés à la CIGB. Ce titre, cette revue est une photographie instantanée de la situation autour des années 2010. Il peut être utile non seulement pour les pays qui ont un cadre juridique et réglementaire réduit ou inexistant pour la sécurité des barrages mais également ceux qui envisagent des changements et des améliorations de leurs législations et réglementations en vigueur.

The Hydraulic Transport and Storage of Extractive Waste Mike Cambridge, 2018-01-18 This book offers the guidelines on long term confinement of fine particulate waste products in a safe and environmentally acceptable location It seeks to present the

state of the art drawing on combined experience from within the European Union EU on good international practice where relevant and on lessons learnt from recent untoward incidents These guidelines have been developed in parallel with the development of the European Standard on Earthworks prEN 16907 and the contents have been influenced by the well publicised need for guidance to all stakeholders on both technical and regulatory aspects of the permitting design and construction of extractive waste facilities in Europe The Extractive Waste Directive EWD imposes a duty on all operators and regulators to ensure the competent design operation and closure of such facilities However though some guidance has been published on a limited number of related technical elements the relevance of these contributions has been diminished by the lack of an integrated approach It is now evident to both regulatory bodies and operators alike that a unified and comprehensive document providing guidance to all stakeholders is required if the future of mining within the EU is to be assured and further untoward incidents avoided These guidelines seek to address all technical stages of the development of a hydraulic fill project in the context of the EWD with an emphasis on waste and facility characterisation and on the risk based assessments which underwrite them They are intended for use by all stakeholders involved in those European industries which involve the generation transport and storage of fine particulate waste products requiring long term confinement in a safe stable and environmentally acceptable location
