Social Sciences Kath Woodward, 2021-12 Fully revised and updated the fourth edition of *Social Sciences The Big Issues* explores key debates about how we live our personal domestic and emotional lives at a time of enormous previously unimaginable change and disruption including a pandemic that locked down households and economies Since the third edition everyone's life has changed The pandemic at least temporarily stopped social life as we knew it and virtually forced governments to close down their economies This is where this edition of *The Big Issues* starts Staying at home posed a radical departure from routine life but reactions to Covid 19 have exposed the endurance of particular social relations especially inequalities which characterize societies worldwide A few of the new big issues covered in this edition include Changing selves and personal lives in light of racism and sexual and identity politics in a pandemic Changing patterns of consumption in relation to market production and what it means for climate change Changing intersections of citizenship migration and globalization in the context of the virus crossing borders and both the opportunities and sources of inequality involved Changing ideas about power politics and populism in the aftermath of Brexit Building on the strong foundation of this well loved text this fully revised fourth edition explores how big issues and social forces intersect to create both change and evidence of continuity especially of social inequalities It provides a clear accessible introduction to the ideas and approaches of the social sciences across a range of disciplines including sociology psychology and politics **Cases**
