have seen significant reforms of insolvency law. The success of such reforms can be enhanced through a clear understanding of difficulties faced by the insolvency profession in achieving successful restructuring and insolvency outcomes and through the determination of effective solutions to those difficulties. However, there is limited empirical data to inform the day to day practice of insolvency nor the difficulties experienced by insolvency practitioners in pursuing insolvency and restructuring solutions. This book addresses this absence of data and understanding, examining the role and practice of corporate insolvency practitioners and exploring the challenges that they encounter. Offering an empirical study together with a comparative analysis of the experiences of practitioners around the world, this book facilitates a greater understanding of corporate insolvency practice, confronting a misunderstanding of and under confidence in corporate insolvency practitioners, making it key reading for academics, practitioners and regulators working in the area of corporate insolvency.
