Handbook of Animal Diversity Richard E. Blackwelder, 2019-08-08 This book is a summary of the diversity between and within the classes of animals It is intended for reference on all aspects of animals that can be studied comparatively but

such comparisons requires that the occurrence of the feature in question be known for more than just one or two groups. It is in large part a book on invertebrate animals because the vertebrates form only a small part of the diversity of animals.

Animal Companions Ingrid H. Tague, 2015-06-17. *Animal Companions* explores how eighteenth century British society perceived pets and the ways in which conversation about them reflected and shaped broader cultural debates. While Europeans kept pets long before the eighteenth century, many believed that doing so was at best frivolous and at worst downright dangerous. Ingrid Tague argues that for Britons of the eighteenth century, pets offered a unique way to articulate what it meant to be human and what society ought to look like. With the dawn of the Enlightenment and the end of the Malthusian cycle of dearth and famine that marked previous eras, England became the wealthiest nation in Europe with a new understanding of religion, science, and non-European cultures, and unprecedented access to consumer goods of all kinds. These transformations generated excitement and anxiety that were reflected in debates over the rights and wrongs of human-animal relationships. Drawing on a broad array of sources including natural histories, periodicals, visual and material culture, and the testimony of pet owners themselves, *Animal Companions* shows how pets became both increasingly visible indicators of spreading prosperity and catalysts for debates about the morality of the radically different society emerging in eighteenth century Britain.

Ecofeminist Literary Criticism Greta Claire Gaard, Patrick D. Murphy, 1998. *Ecofeminist Literary Criticism* is the first collection of its kind, a diverse anthology that explores both how ecofeminism can enrich literary criticism and how literary criticism can contribute to ecofeminist theory and activism. Ecofeminism is a practical movement for social change that discerns interconnections among all forms of oppression: the exploitation of nature, the oppression of women, class exploitation, racism, colonialism. Against binary divisions such as self/other, culture/nature, man/woman, humans/animals, and white/non-white, ecofeminist theory asserts that human identity is shaped by more fluid relationships and by an acknowledgment of both connection and difference. Once considered the province of philosophy and women's studies, ecofeminism in recent years has been incorporated into a broader spectrum of academic discourse. *Ecofeminist Literary Criticism* assembles some of the most insightful advocates of this perspective to illuminate ecofeminism as a valuable component of literary criticism.
