experience with a close relationship to achievement and school failure Children who self set academic goals attend school regularly and on time behave well in class complete their homework and study at home are likely to interact adequately with the school social and physical environments and perform well in school In contrast children who miss school are more likely to display disruptive behaviors in class miss homework frequently exhibit violent behaviors on the playground fail subjects be retained and if the behaviors persist quit school Moreover engagement should also be considered as an important school outcome eliciting more or less supportive reactions from educators For example children who display school engaged behaviors are likely to receive motivational and instructional support from their teachers. The opposite may also be true But what makes student engage more or less The relevant literature indicates that personal variables e.g. sensory motor neurodevelopmental cognitive motivational emotional behavior problems learning difficulties addictions social and or cultural variables e g negative family conditions child abuse cultural deprivation ethnic conditions immigration or school variables e g coexistence at school bullying cyberbullying may concurrently hinder engagement preventing the student from acquiring the learnings in the same conditions as the rest of the classmates Acing Writing in IGCSE English as a Second Language 0510 Dorothy Lung, 2023-07-07 Boost your success in the IGCSE English as a Second Language 0510 exam with this handy study guide Dive into a treasure trove of model answers specifically tailored to Exercises 4.5 and 6 from past years Paper 2.
