Nature-based Solutions for Resilient Ecosystems and Societies Shalini Dhyani, Anil Kumar Gupta, Madhav Karki, 2020-07-07

Over the past few decades the frequency and severity of natural and human induced disasters have increased across Asia. These disasters lead to substantial loss of life, livelihoods and community assets which not only threatens the pace of socio-economic development but also undo hard earned gains. Extreme events and disasters such as floods, droughts, heat, fire, cyclones and tidal surges are known to be exacerbated by environmental changes including climate change, land use changes and natural resource degradation. Increasing climate variability and multi-dimensional vulnerabilities have severely affected the social, ecological and economic capacities of the people in the region who are economically speaking those with the least capacity to adapt. Climatic and other environmental hazards and anthropogenic risks coupled with weak and wavering capacities severely impact the ecosystems and Nature's Contributions to People (NCP) and thereby to human well-being. Long-term resilience building through disaster risk reduction and integrated adaptive climate planning therefore has become a key priority for scientists and policymakers alike. Nature-based Solutions (NbS) is a cost-effective approach that utilizes ecosystem and biodiversity services for disaster risk reduction and climate change adaptation while also providing a range of co-benefits like sustainable livelihoods and food, water and energy security. This book discusses the concept of Nature-based Solutions (NbS) both as a science and as art and elaborates on how it can be applied to develop healthy and resilient ecosystems locally, nationally, regionally and globally. The book covers illustrative methods and tools adopted for applying NbS in different countries. The authors discuss NbS applications and challenges, research trends and future insights that have wider regional and global relevance. The aspects covered include landscape restoration, ecosystem-based adaptation, ecosystem-based disaster risk reduction, ecological restoration, ecosystem-based protected areas management, green infrastructure development, nature-friendly infrastructure development in various ecosystem types, agro-climatic zones and watersheds. The book offers insights into understanding the sustainable development goals (SDGs) at the grass roots level and can help indigenous and local communities harness ecosystem services to help achieve them. It offers a unique essential resource for researchers, students, corporations, administrators and policymakers working in the fields of the environment, geography, development, policy, planning, the natural sciences, life sciences, agriculture, health, climate change and disaster studies.

Englishness Identified Paul Langford, 2001

In the seventeenth century the English were often depicted as a nation of barbarians, fanatics and king-killers. Two hundred years later they were more likely to be seen as the triumphant possessors of a unique political stability, vigorous industrial revolution and a world-wide empire. These may have been British achievements but the virtues which brought about this transformation tended to be perceived as specifically English. Ideas of what constituted Englishness changed from a stock notion of waywardness and unpredictability to one of discipline and dedication. The evolution of the so-called national character today, once more the subject of scrutiny and debate, is traced

through the impressions and analyses of foreign observers and related to English ambitions and anxieties during a period of intense change *No Outsiders: Everyone Different, Everyone Welcome* Andrew Moffat, 2020-03-09 The No Outsiders programme promotes an ethos of inclusion and tolerance and aims to prepare children for life in modern Britain Expanding the scheme published in the 2015 book *No Outsiders in Our Schools* this book is designed to further support educators as they make the No Outsiders ethos part of their school culture at a time when messages of fear and division are rife Written by a practising teacher whose work to promote equality has been globally celebrated this book provides lesson plans for use in classes from EYFS to Year 6 Key features of the resource include plans for delivering the No Outsiders message through assemblies and classes allowing for a flexible approach recommendations for picture books that can be used to support messages of diversity and inclusion a scheme of work designed to meet the requirements of the Equalities Act 2010 and support teachers as they prepare to implement the new Relationships Education curriculum 2020 It is the responsibility of primary schools to promote equality and diversity This is a vital resource for all teachers and trainee teachers as they prepare children for a life where diversity is embraced and there is no fear of difference **SAS2** Jacques M Chevalier, Daniel J Buckles, 2008-11-11 SAS2 A Guide to Collaborative Inquiry and Social Engagement represents a groundbreaking international effort to support the creation and mobilization of practical authentic knowledge for social change The guiding principle behind SAS2 Social Analysis Systems www.sas2.net is that group dialogue and social inquiry are crucial for local and global development Social issues must be addressed socially and in a multistakeholder mode not by private interests and experts alone and the insights that emerge must be fully integrated into processes of knowledge production planning and decision making Part 1 outlines the concepts and skillful means needed to support multistakeholder dialogue and engagement It also provides detailed instructions on how to integrate and ground collaborative inquiry in the projects plans evaluations and activities of multiple stakeholders Part 2 presents a selection of techniques for collaborative inquiry and examples of real life applications in South Asia and Latin America The examples focus on a range of issues including land tenure local economic development agriculture forestry fisheries and organizational development This book will be an invaluable resource for researchers consultants facilitators and activists working with people to solve problems and support inclusive inquiry and decision making It will also be useful to scholars and academics studying and teaching participatory action research in the social sciences *The Stranger in Ancient and Mediaeval Jewish Tradition* Géza G.
