Legge and the Chinese Classics Marilyn Laura Bowman,2016 Long interested in the history of China and in the countries of the Silk Road she has travelled widely in Asia and Europe seeking places with their historical connections Her encounter with James Legge combined her professional interests with her interests in Asian history The challenging events that James Legge experienced across his life in Hong Kong revealed his exceptional linguistic talents and steadfast resilience her own peculiar department as Legge described his interests As she discovered his rich blend of talent and resilience in a setting of great political and cultural conflict she wanted more people to know about this outstanding man **Concepts of Chinese**

Science and Traditional Healing Arts Peng Yoke Ho,F. Peter Lisowski,1993 This brief discourse is an introduction to the historical development of medicine in China whose influence on Korea Japan and Southeast Asia was profound and even reached far west into the Islamic world The authors wish to make the interested reader aware of China s rich contribution to the world growth of the medical sciences Too often the view has been taken that the history of medicine began with the discoveries of the Greeks and those ancient nations from whom they learnt The authors want to redress this view and acquaint readers with a glimpse of the concepts and history of Chinese medicine and hope that they will feel encouraged to delve deeper National Library of Medicine Current Catalog National Library of Medicine (U.S.), Codes of Modernity

Uluğ Kuzuoğlu,2023-11-28 In the late nineteenth century Chinese reformers and revolutionaries believed that there was something fundamentally wrong with the Chinese writing system The Chinese characters they argued were too cumbersome to learn blocking the channels of communication obstructing mass literacy and impeding scientific progress What had sustained a civilization for more than two millennia was suddenly recast as the root cause of an ongoing cultural suicide China needed a new script to survive in the modern world *Codes of Modernity* explores the global history of Chinese script

reforms efforts to alphabetize or simplify the writing system from the 1890s to the 1980s Examining the material conditions and political economy underlying attempts to modernize scripts Ulu Kuzuo lu argues that these reforms were at the forefront of an emergent information age Faced with new communications technologies and infrastructures as well as industrial educational and bureaucratic pressures for information management reformers engineered scripts as tools to increase labor efficiency and create alternate political futures Kuzuo lu considers dozens of proposed scripts including phonetic alphabets syllabaries character simplification schemes latinization and pinyin Situating them in a transnational framework he stretches the geographical boundaries of Chinese script reforms to include American behavioral psychologists Soviet revolutionaries and Central Asian typographers who were all devising new scripts in pursuit of informational efficiency Codes of Modernity brings these experiments together to offer new ways to understand scripts and rethink the shared experiences of a global information age
