innate structures and learned information interact to produce adult forms of cognition e g about number and how does such learning take place What innate abilities underlie the creative aspect of language and of creative cognition generally What are the innate foundations of human motivation and of human moral cognition In the course of their discussions many of the contributors pose the question whether explicitly or implicitly Where next for nativist research Together these three volumes provide the most intensive and richly cross disciplinary investigation of nativism ever undertaken They point the way toward a synthesis of nativist work that promises to provide a powerful picture of our minds and their place in the natural order
