 Parsegian, 1968 Caveman Chemistry Kevin M. Dunn, 2003 Half a million years ago our ancestors learned to make fire
 from scratch They crafted intricate tools from stone and brewed mind altering elixirs from honey Their descendants
 transformed clay into pottery wool into clothing and ashes into cleansers In ceramic crucibles they won metal from rock the
 metals lead to colored glazes and glass Buildings of brick and mortar enshrined books of parchment and paper Kings and
 queens demanded ever more colorful clothing and accessories in order to out class clod hoppers and call girls Kingdoms rose
 and fell by the power of saltpeter sulfur and charcoal And the demands of everyday folk for glass and paper and soap
 stimulated the first round of chemical industrialization From sulfuric acid to sodium carbonate From aniline dyes to analgesic
 drugs From blasting powder to fertilizers and plastics In a phrase From Caveman to Chemist Your guides on this journey are
 the four alchemical elements Fire Earth Air and Water These archetypical characters deliver first hand accounts of the births
 of their respective technologies The spirit of Fire for example was born in the first creature to cultivate the flame This spirit
 passed from one person to another from one generation to another from one millennium to another arriving at last in the
 pages of this book The spirit of Earth taught folks to make tools of stone the spirit of Air imparted knowledge of units and the
 spirit of Water began with the invention of spirits Having traveled the world from age to age who can say where they will find
