Animal Life Stephen Aitken:

Animal Life Stephen Aitken, 2013-08-01 From reptiles to grizzly bears animals are on the move seeking cooler places to live Climate change is affecting animals all over the planet from the tropics to the poles Spring is arriving earlier and the migration patterns of many birds are changing How can we help animals adapt to the impacts from climate change Time to Act fact boxes and quotes by notable ecologists will help your readers understand the essentials

Ecosystems at Risk Stephen Aitken, 2013-08-01 Readers will learn that as global temperatures continue to rise ecosystems all over the world are at risk Islands and mountains are among the most vulnerable and many species are expected to go extinct Polar regions are warming at close to twice the rate of the rest of the world impacting marine and terrestrial life as well as global climate patterns

Fish and Other Sea Creatures Tom Jackson, 2016-07-15 Readers take a dive underwater to take an in depth look at the mechanics behind fish and other sea creatures Marine creatures are made to fit their environments whether they live in shallow reefs or the deep sea This book describes the technology behind the super senses of sharks the speed of a sailfish and the propulsion of squid How big are giant clams How does a stonefish launch a sneak attack Readers will learn the answers to these questions and more through fascinating text and fact boxes Color photographs bring readers to the depths of the sea to come face to face with these mechanical wonders

People Stephen Aitken, 2013-08-01 This must have book provides comprehensive information on climate change and its effects on the human population

Plants and Insects Stephen Aitken, 2013-08-01 Readers will learn that the ability of plants and insects to reproduce and expand their ranges is affected by changes in temperature and precipitation The timing between insect pollinators and the flowering plants is also impacted by climate change We need to conserve the delicate balance in our ecosystems as carbon dioxide levels rise even further

Saving the Night Stephen Aitken, 2023-03-14 Light pollution threatens the survival of every living species on our planet including people It started when Thomas Edison invented the first light bulb more than 150 years ago Then as electric light became more common light pollution began to take over cities and towns Today in urban centers all over the world the stars in the sky aren't visible Millions of people have never seen the Milky Way In *Saving the Night* we discover how plants and animals have adapted over millions of years to survive and thrive in the dark and how artificial light can upset the balance of entire ecosystems But there are ways we can take back the night for animals plants and us It starts with the flick of a switch

Living Light Stephen Aitken, 2024-10-15 Bioluminescent animals make their own light to survive A firefly lights up the night sky a foxfire mushroom sets the forest floor aglow and sea butterflies shine like beacons deep in the ocean These glowing species are one of the most spectacular wonders of the natural world and they are found on land in the air and in the depths of the ocean In *Living Light* discover how and why bioluminescent creatures glow and what that special ability can tell scientists about how diseases such as cancer and malaria spread in humans These light makers are facing threats from the effects of climate change pollution and loss of habitat and they need our protection Young readers will learn how

they can shine a light on bioluminescent species and use citizen science to conserve their habitats and keep these creatures glowing into the future The epub edition of this title is fully accessible **Wild Horse Scientists** Kay Frydenborg,2012 This title in the Scientists in the Field series sheds light on wild horse population control a largely ignored area of equine animal science Full color Listen Up! Stephen Aitken,2022-09-13 The sounds of nature are being drowned out by the clamor of human activity and that s not good for people animals or the environment Every living thing emits sound birds sing whales whistle streams burble and trees pop and fizz In Listen Up young readers are introduced to all the sounds of the natural world from the first Big Bang to the complex soundscapes of the rainforests Readers will also discover how the invasion of human sounds from airplanes traffic and machines is threatening the survival of species that have adapted to their habitats over thousands of years Conserving the sounds of nature is an important part of addressing the biggest challenges facing humanity today protecting the planet s biodiversity and the future of our natural world *Reptiles and Amphibians* Discovery Channel (Firm),2000 An Explore Your World Handbook
