The "One China" Dilemma P. Chow, 2008-04-28 The new developments across the Taiwan Strait have illuminated the dilemma of the One China policy which could mislead to inconsistent or even contradictory policies and result in devastating military confrontation between China and the U S and possibly Japan

Phoenix from the Ashes Cameron Scott Mitchell, 2009-12-01 The continued existence of the Russian defence and arms industry OPK was called into question following the disintegration of the Soviet Union in 1991 Industry experts cited the lack of a domestic market endemic corruption and excess capacity within the industry as factors underpinning its predicted demise However the industry's export customers in China India and Iran during those early years became the OPK's saving grace Their orders introduced hard currency back into the industry and went a long way to preventing the forecasted OPK collapse Although pessimistic predictions continued to plague the OPK throughout the 1990s the valuable export dollars provided the OPK the breathing space it needed to claw back its competitive advantage as an arms producer That revival has been further underpinned by a new political commitment various research and development initiatives and the restoration of defence industry as a tool of Russian foreign policy The short term future of the Russian OPK looks promising The rising domestic defence order is beginning to challenge the export market as the OPK's most important customer Meanwhile exports will be safeguarded by continued foreign demand for niche Russian defence products Although the long term future of the OPK is more difficult to predict Russia's solid research and development foundation and successful international joint military ventures suggest that the current thriving trend in exports is likely to continue Russia represents the next generation of affordable and rugged military equipment for the arsenals of the developing world Coupled with Russia's growing ability to rearm itself through higher oil prices and a more streamlined defence industry the future of the OPK looks bright

Transparency and American Primacy in World Politics James J. Marquardt, 2016-02-24 At a time when greater transparency is needed this book advances a novel explanation of America's efforts to advance greater transparency in international relations Marquardt argues that American statesmen have long sought to secure an American dominated international system to encourage states to be more open and forthcoming about their internal affairs Yet the United States routinely uses its calls for military transparency in particular as a policy instrument to discipline its rivals and therefore paradoxically contributes to greater tension in international relations In contrast to conventional thinking about transparency in relation to overcoming power politics and promoting international cooperation this book explores the relationship between America's power and international security competition Though analytically distinct openness and transparency have served the same strategic goal ensuring America's position of preponderance in the international system **Report to Congress**

Shirk, 2007-04-16 Once a sleeping giant China today is the world's fastest growing economy the leading manufacturer of cell phones laptop computers and digital cameras a dramatic turn around that alarms many Westerners But in China The Fragile Superpower Susan L Shirk opens up the black box of Chinese politics and finds that the real danger lies elsewhere not in China's astonishing growth but in the deep insecurity of its leaders China's leaders face a troubling paradox the more developed and prosperous the country becomes the more insecure and threatened they feel Shirk a former Deputy Assistant

Secretary of State responsible for China knows many of today's Chinese rulers personally and has studied them for three decades. She offers invaluable insight into how they think and what they fear. In this revealing book, readers see the world through the eyes of men like President Hu Jintao and former President Jiang Zemin. We discover a fragile communist regime desperate to survive in a society turned upside down by miraculous economic growth and a stunning new openness to the greater world. Indeed, ever since the 1989 pro-democracy protests in Tiananmen Square and the fall of communism in the Soviet Union, Chinese leaders have been haunted by the fear that their days in power are numbered. There is a regime afraid of its own citizens, and this fear motivates many of their decisions when dealing with the U.S. and other foreign nations. In particular, the fervent nationalism of the Chinese people combined with their passionate resentment of Japan and attachment to Taiwan have made relations with these two regions a minefield. It is here Shirk concludes in the tangled interactions between Japan, Taiwan, China, and the United States that the greatest danger lies. Shirk argues that rising powers such as China tend to provoke wars in large part because other countries mishandle them. Unless we understand China's brittle internal politics and the fears that motivate its leaders, we face the very real possibility of avoidable conflict with China. This book provides that understanding.

China: Fragile Superpower Susan L. Shirk, 2007-04-16

Once a sleeping giant, China today is the world's fastest growing economy, the leading manufacturer of cell phones, laptop computers, and digital cameras, a dramatic turn around that alarms many Westerners. But in China, the fragile superpower, Susan L. She offers invaluable insight into how they think and what they fear. In this revealing book, readers see the world through the eyes of men like President Hu Jintao and former President Jiang Zemin. Towards a Northeast Asian Security Community Bernhard Seliger, Werner Pascha, 2011-06-25 The Northeast Asian security environment is closely linked to Korea's growth perspectives for the future The spectacular rise of the South Korean economy in the past half century also known as Miracle on the Han River has been duly highlighted as one of the most successful cases of economic development worldwide However among the factors curbing South Korea's growth perspectives has been from the very beginning of its rise the coexistence of the difficult neighbour to the North Democratic People's Republic of Korea While in the cold war this coexistence has been taken as inevitable after the end of the cold war there were hopes to overcome this obstacle to further growth either through collapse or enhanced cooperation with the North neither of which became reality North Korea's unprecedented aggressiveness and development of long range ballistic missiles and nuclear devices made this threat truly an international question with multilateral talks coming into existence as ad hoc measures to cope with the nuclear crisis It was then that the idea of a Northeast Asian Security Community was born The contributions in this book discuss how a peaceful solution of the security problems could not only enhance stability of Korea's economy and reduce the defense burden considerably the so called peace dividend but would facilitate regional investments safer and regional solutions for common

economic problems When discussing the possibilities of a security framework or in an institutionalized form security community in Northeast Asia the authors in this volume are realistic as to not fall into the trap of wishful thinking which so often has characterized approaches to North Korea resulting in disappointment The past two years again saw the rising of tensions in Northeast Asia and the masterful way in which even an impoverished and isolated country can play its cards While it seems a new ice age between the two Koreas is possible nevertheless and maybe even more than ever the search for a stable security framework for Northeast Asia as a precondition for peaceful economic cooperation and development will go on The chapters in this volume contribute to the ongoing debate to secure peace and development in Northeast Asia making this book of interest to both academics and policy makers alike *Index to International Statistics* ,2008
