Pilgrim By Mariana K That's how life is that's life It raises you up it knocks you down but you go ahead by continuously wiping the dust off your hands now scratching a knee then wiping out another tear but keep on going you start it over and over again whenever necessary since the minutes elapsed cannot be turned back nor redeemed though you can make them count You leave behind the days when you only dreamed your life but you did not live it the days when you have been through so many without asking for them nor wanting things to happen the feeling that the light would always be off and you

find it hard to breathe the time when the very self of you was just out of yourself wandering throughout ways and winters You turn all hardships smithereens and smoke you invest the feelings in people and not in things you go ahead even if still looking back but life is ahead it is in you and as long as you feel it as long as you live it come what may Life is so beautiful and full that its hard tries no longer frighten you ten years spent in solitude do not scare you just to know that you are living that you are part of the world of the universe Is that all it can be Yet it is not Life is many more in one place all that we laugh what we build together everything we love all that gives us a sense everything we weep at and suffer from it means the years past and the ones that are right now and yet to come It materializes itself in the seconds that pass through heartbeats in our breath deep inside our chest We ourselves are the ones inside the ones who live our life by clenching our fists and fall ceaselessly hoping consuming happiness and love every living and feeling to the last of its molecule and its very existence We do not miss a thing We never give up *Modern Political Economics* Yanis Varoufakis, Joseph Halevi, Nicholas J.

Theocarakis, 2012-03-29 Once in a while the world astonishes itself Anxious incredulity replaces intellectual torpor and a puzzled public strains its antennae in every possible direction desperately seeking explanations for the causes and nature of what just hit it 2008 was such a moment Not only did the financial system collapse and send the real economy into a tailspin but it also revealed the great gulf separating economics from a very real capitalism Modern Political Economics has a single aim To help readers make sense of how 2008 came about and what the post 2008 world has in store The book is divided into two parts The first part delves into every major economic theory from Aristotle to the present with a determination to discover clues of what went wrong in 2008 The main finding is that all economic theory is inherently flawed Any system of ideas whose purpose is to describe capitalism in mathematical or engineering terms leads to inevitable logical inconsistency an inherent error that stands between us and a decent grasp of capitalist reality The only scientific truth about capitalism is its radical indeterminacy a condition which makes it impossible to use science's tools e.g. calculus and statistics to second guess it The second part casts an attentive eye on the post war era on the breeding ground of the Crash of 2008 It distinguishes between two major post war phases The Global Plan 1947-1971 and the Global Minotaur 1971-2008 This dynamic new book delves into every major economic theory and maps out meticulously the trajectory that global capitalism followed from post war almost centrally planned stability to designed disintegration in the 1970s to an intentional magnification of unsustainable imbalances in the 1980s and finally to the most spectacular privatisation of money in the 1990s and beyond Modern Political Economics is essential reading for Economics students and anyone seeking a better understanding of the 2008 economic crash **Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ...
