Bonding Lab: Molecular Model Building

Purpose: The purpose of this lab is to build three dimensional models of several simple covalent molecules and to predict their shapes and polarities.

Pre-Lab Questions

1. Explain the difference between a single, double and triple covalent bond.
2. Explain the difference between a polar and a non-polar bond.
3. Explain the difference between a polar and a non-polar molecule.

Procedure:

Part A: Construct a H_2 , O_2 and N_2 and HF molecule.

1. Why is the HF molecule polar while all the other two-atom molecules were non-polar?
2. What determined how many bonds were formed between the two atoms?

	H_2	O_2	N_2	HF

In Search of More Solutions Janet Taylor, 1995 *In Search of More Solutions* provides material for chemical egg race competitions that help to put the fun back into chemistry and gives students that little bit extra to motivate them to follow a scientific or technical career Aimed at those following post 16 chemistry courses the book encourages students to design their own experiments in relation to the tasks set and as they overcome the obstacles within the tasks their inventiveness and enthusiasm flourishes Fifty activities are described providing students with opportunities to develop their problem solving skills and teachers with ideas for assignments and investigations The tasks set in this book have been trialled in schools and colleges around the UK

Visualization in Science Education John K. Gilbert, 2006-03-30 *Visualization in Science Education* draws on the insights from cognitive psychology science and education by experts from Australia Israel Slovenia UK and USA It unites these with the practice of science education particularly the ever increasing use of computer managed modelling packages especially in chemistry The first section explores the significance and intellectual standing of visualization The second section shows how the skills of visualization have been developed practically in science education This is followed by accounts of how the educational value of visualization has been integrated into university courses in physics genomics and geology The fourth section documents experimental work on the classroom assessment of visualization An endpiece summarises some of the research and development needed if the contribution of this set of universal skills is to be fully exploited at all levels and in all science subjects

Chemistry John A. Olmsted, Gregory M. Williams, Robert Charles Burk, 2016-01-14 Olmsted Burk is an introductory general chemistry text designed specifically with Canadian professors and students in mind A reorganized Table of Contents and inclusion of SI units IUPAC standards and Canadian content designed to engage and motivate readers distinguish this text from many of the current text offerings It more accurately reflects the curriculum of most Canadian institutions Instructors will find the text sufficiently rigorous while it engages and retains student interest through its accessible language and clear problem solving program without an excess of material that makes most text appear daunting and redundant

National Bureau of Standards,1970 *Molecular Electrostatic Potentials* J.S. Murray,K. Sen,1996-11-22 Over the past 25 years the molecular electrostatic potential has become firmly established as an effective guide to molecular interactions With the recent advances in computational technology it is currently being applied to a variety of important chemical and biological systems Its range of applicability has expanded from primarily a focus on sites for electrophilic and nucleophilic attack to now include solvent effects studies of zeolite molecular cluster and crystal behavior and the correlation and prediction of a wide range of macroscopic properties Moreover the increasing prominence of density functional theory has raised the molecular electrostatic potential to a new stature on a more fundamental conceptual level It is rigorously defined in terms of the electron density and has very interesting topological characteristics since it explicitly reflects opposing contributions from the nuclei and the electrons This volume opens with a survey chapter by one of the original pioneers of the use of the electrostatic potential in studies of chemical reactivity Jacopo Tomasi Though the flow of the succeeding chapters is not stringently defined the overall trend is that the emphasis changes gradually from methodology to applications Chapters discussing more theoretical topics are placed near the end Readers will find the wide variety of topics provided by an international group of authors both convincing and useful Congressional Record United States. Congress,1972 **Physical Chemistry from Ostwald to Pauling** John W. Servos,2021-05-11 John Servos explains the emergence of physical chemistry in America by presenting a series of lively portraits of such pivotal figures as Wilhelm Ostwald A A Noyes G N Lewis and Linus Pauling and of key institutions including MIT the University of California at Berkeley and Caltech In the early twentieth century physical chemistry was a new hybrid science the molecular biology of its time The names of its progenitors were familiar to everyone who was scientifically literate studies of aqueous solutions and of chemical thermodynamics had transformed scientific knowledge of chemical affinity By exploring the relationship of the discipline to industry and to other sciences and by tracing the research of its leading American practitioners Servos shows how physical chemistry was eclipsed by its own offspring specialties like quantum chemistry
