The Final Theory Mark McCutcheon,2010 A key unresolved issue lies at the heart of our science the quest of Aristotle Newton Einstein Hawking and many others now widely known as the Theory of Everything This ultimate understanding is expected to transform science and resolve its many mysteries all via one single overlooked principle in nature that will explain simplify and unify everything This quest has produced theories such as Special Relativity General Relativity and Quantum Mechanics enormous investments in powerful particle accelerators and space telescopes and such recent pursuits as Dark Matter and Dark Energy But enormous problems remain these theories projects and pursuits are all completely separate and frequently incompatible presenting unresolved abstractions speculation paradoxes and mysteries that often even violate our laws of physics upon closer examination As a result the Theory of Everything continues to elude us with no clear way forward The Final Theory clearly shows why this is the case exposing centuries of well intentioned but misguided scientific thought that has locked us into an erroneous and highly troubled energy based science that has taken us far off track It corrects the errors in our scientific legacy showing that energy is actually a misunderstanding of the unifying principle we have sought for centuries a principle that is active all around us producing all known phenomena such as gravity light electricity and magnetism This new understanding replaces both Newton s

gravitational force theory and Einstein's warped space time General Relativity Theory while also overturning such theories as Special Relativity and Quantum Mechanics In their place is a single simple principle that finally demystifies explains and unifies everything Read The Final Theory and judge for yourself whether the Theory of Everything has finally arrived
