Student Exploration: Building DNA

Directions: Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes.

Vocabulary: double helix, DNA, enzyme, mutation, nitrogenous base, nucleoside, nucleotide, replication

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

DNA is an incredible molecule that forms the basis of life on Earth. DNA molecules contain instructions for building every living organism on Earth, from the tiniest bacterium to a massive blue whale. DNA also has the ability to **replicate**, or make copies of itself. This allows living things to grow and reproduce.

1. Look at the DNA molecule shown at right. What does it look like?

A double helix strand, and a spiral staircase. This shape is called a double helix.

This shape is called a **double helix**.

2. Based on this picture, how do you think a DNA molecule makes a copy of itself? (Hint: Look at the bottom two "rungs" of the ladder.)

The DNA strands separated the enzyme called DNA polymerase which copies each strand using the base-pairing rule.

Gizmo Warm-up

The *Building DNA* Gizmo allows you to construct a DNA molecule and go through the process of DNA replication. Examine the components that make up a DNA molecule.

1. What are the two DNA components shown in the Gizmo?

Nucleosides and Phosphates

2. A **nucleoside** has two parts: a pentagonal sugar (deoxyribose) and a **nitrogenous base** (in color). When a nucleoside is joined to a phosphate, it is called a **nucleotide**.

How many different nitrogenous bases do you see?

Four different nitrogenous bases

The Language of Science Education William F. McComas, 2013-12-30 The Language of Science Education An Expanded Glossary of Key Terms and Concepts in Science Teaching and Learning is written expressly for science education professionals and students of science education to provide the foundation for a shared vocabulary of the field of science teaching and learning Science education is a part of education studies but has developed a unique vocabulary that is occasionally at odds with the ways some terms are commonly used both in the field of education and in general conversation Therefore understanding the specific way that terms are used within science education is vital for those who wish to understand the existing literature or make contributions to it The Language of Science Education provides definitions for 100 unique terms but when considering the related terms that are also defined as they relate to the targeted words almost 150 words are represented in the book For instance laboratory instruction is accompanied by definitions for openness wet lab dry lab virtual lab and cookbook lab Each key term is defined both with a short entry designed to provide immediate access following by a more extensive discussion with extensive references and examples where appropriate Experienced

readers will recognize the majority of terms included but the developing discipline of science education demands the consideration of new words For example the term blended science is offered as a better descriptor for interdisciplinary science and make a distinction between project based and problem based instruction Even a definition for science education is included The Language of Science Education is designed as a reference book but many readers may find it useful and enlightening to read it as if it were a series of very short stories

Critical English for Academic Purposes

Sarah Benesch, 2001-03-01 Critical English for Academic Purposes Theory Politics and Practice is the first book to combine the theory and practice of two fields English for academic purposes and critical pedagogy English for academic purposes EAP grounds English language teaching in the cognitive and linguistic demands of academic situations tailoring instruction to specific rather than general purposes Critical pedagogy acknowledges students and teachers subject positions that is their class race gender and ethnicity and

encourages them to question the status quo Critical English for academic purposes engages students in the types of activities they are asked to carry out in academic classes while inviting them to question and in some cases transform those activities as well as the conditions from which they arose It takes into account the real challenges non native speakers of English face in their discipline specific classes while viewing students as active participants who can help shape academic goals and assignments Critical English for Academic Purposes Theory Politics and Practice relates English for academic purposes and critical pedagogy revealing and problematizing the assumptions of both fields provides theoretical and practical responses to academic syllabi and other institutional demands to show that teachers can both meet target demands and take students subjectivities into account in a climate of negotiation and possibility offers rights analysis as a critical counterpart to needs analysis discusses the politics of coverage in lecture classes and proposes alternatives and features teaching examples that address balancing the curriculum for gender building community in an EAP class of students from diverse economic and social backgrounds students rights and organizing students to change unfavorable conditions This book is intended for undergraduate and graduate courses for preservice and in service ESL and EAP teachers It is also a professional book for those interested in critical approaches to teaching and EAP *An Introduction to Cryptography* Richard A.
