Concept and Form is a two volume monument to the work of the philosophy journal the Cahiers pour l'Analyse 1966-69 the most ambitious and radical collective project to emerge from French structuralism. Inspired by their teachers Louis Althusser and Jacques Lacan the editors of the Cahiers sought to sever philosophy from the interpretation of given meanings or experiences focusing instead on the mechanisms that structure specific configurations of discourse from the psychological and ideological to the literary scientific and political. Adequate analysis of the operations at work in these configurations they argue helps prepare the way for their revolutionary transformation. This first volume comprises English translations of some of the most important theoretical texts published in the journal written by thinkers who would soon be counted among the most inventive and influential of their generation: Alain Badiou, Yves Durox, Alain Grosrichard, Serge Leclaire, Jacques-Alain Miller, Jean-Claude Milner and François Regnault. The book is complemented by a second volume consisting of essays and interviews that assess the significance and legacy of the journal and by an online edition of the full set of original Cahiers texts produced by the Centre for Research in Modern European Philosophy at Kingston University London and accessible at cahiers.kingston.ac.uk
