Interactive Collaborative Learning Michael E. Auer, David Guralnick, James Uhomoibhi, 2017-01-07 This book presents the proceedings of the 19th International Conference on Interactive Collaborative Learning held 21-23 September 2016 at Clayton Hotel in Belfast UK. We are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of developments in both technology and the global markets, and the growing need for flexibility and agility are essential and challenging elements of this process that have to be addressed in general but especially in the context of engineering education. To face these topical and very real challenges, higher education is called upon to find innovative responses. Since being founded in 1998, this conference has consistently been devoted to finding new approaches to learning with a focus on collaborative learning. Today, the ICL conferences have established themselves as a vital forum for the exchange of information on key trends and findings and of practical lessons learned while developing and testing elements of new technologies and pedagogies in learning. **The Teaching Revolution** William N. Bender, Laura Waller, 2011-08-15 Imagine the school of the future. The Teaching Revolution challenges educators to imagine schools the way they should be, with a big picture vision that includes student-driven curricula, interconnectivity, and targeted responsiveness to students' individual needs. The authors provide a futuristic and provocative discussion on combining three major instructional innovations: RTI, technology, and differentiation. Drawing on the growing 21st-century skills movement, the text engagingly weaves these three areas into a vision for school transformation that includes utilizing mobile technologies, Web-based instruction, and social media. RTI that benefits all students and whole schools in their improvement efforts. Project-based learning focused on answering real-world questions. The symbiosis of RTI, technology, and differentiated instruction is so impactful that it will soon dramatically reform teaching. The Teaching Revolution will dare you to dream and guide you through the process of transforming education to become all that you can imagine.
