Four Shades of Gray Simon Peter Rowberry,2022-04-05 This first book length analysis of Amazon s Kindle explores the platform s technological bibliographical and social impact on publishing Four Shades of Gray offers the first book length analysis of Amazon s Kindle and its impact on publishing Simon Peter Rowberry recounts how Amazon built the infrastructure for a new generation of digital publications then considers the consequences of having a single company control the direction of the publishing industry Exploring the platform from the perspectives of technology texts and uses he shows how the Kindle challenges traditional notions of platforms as discrete entities He argues that Amazon s influence extends beyond disruptive technology to embed itself in all aspects of the publishing trade yet despite industry pushback he says the Kindle has had a positive influence on publishing Rowberry documents the first decade of the Kindle with case studies of Kindle Popular Highlights an account of

the digitization of books published after 1922 and a discussion of how Amazon's patent filings reflect a shift in priorities Rowberry argues that while it was initially convenient for the book trade to outsource ebook development to Amazon doing so has had adverse consequences for publishers in the mid and long term limiting opportunities for developing an inclusive and forward thinking digital platform While it has forced publishers to embrace digital forms the Kindle has also empowered some previously marginalized readerships Although it is still too early to judge the long term impact of ebooks compared with that of the older technologies of clay tablets the printing press and offset printing the shockwaves of the Kindle continue to shape publishing

Climate Governance and Urban Planning Deborah Heinen,2022-12-08 Urban planning as a discipline is deeply integral to implementing a low carbon future This book fosters an understanding for how the rules in use that govern urban planning influence the ability to implement low carbon development patterns Drawing on the theoretical foundations of the climate governance and urban planning literatures the book provides a context to understand plan implementation challenges and obstacles in metropolitan areas As metropolitan regions across the globe seek to reduce emissions from transportation many levels of governments have developed ambitious climate action plans that make land use and transportation recommendations in order to reduce vehicle miles traveled Many

have recommended low carbon development patterns which are characterized by intensified and diversified uses around rapid transit stations. However, the implementation of these recommendations is done within the context of different rules in use unique to the planning systems in each metropolitan region. The book examines the rules in use in three metropolitan regions of similar demographic size: the Metro Vancouver Puget Sound and the Stuttgart regions. By examining the implementation of low carbon development patterns, the book focuses on growth management related questions about how to coordinate transit investments with land use decisions in metropolitan regions. The book finds that state legislation that deals with metropolitan planning and regional growth strategies can greatly aid in creating accountability among actors as well as provide a road map to navigate conflicts when implementing low carbon development patterns. By focusing on the rules in use, the book is of interest to policy makers, planners, advocates, and researchers who wish to assess and improve the odds of implementing low carbon development patterns in a metropolitan region.

Villacorta,2019-09-23 Unmasking the Male Soul is about freedom that confronts the innate and enslaving obsession for power and control in destructive ways At the core of this liberating process we must acknowledge that we cannot escape the sociocultural matrix in which every human being emerges In denying their fallen nature human beings set aside their dependency on God and become self centered and self reliant It is from their self centered hearts that human beings foster dynamics of coercion domination competition and distorted self realization at the expense of others This cycle of shame and guilt is well disguised behind a mask which enables them to enact these dynamics in subtle ways At times even in the name of religion men followed the illusion of their internal insecurities and became dependent on masks of power and control It is time to break away from the chains of exclusion and devaluation of women in Christian leadership Masculinities have only perpetrated a narrative of exceptionalism as the apex of humankind and often they have contrasted to subservient expectations of women in leading others Each chapter responds to the implicit male silence on the issue in a multidisciplinary way with historical sociocultural theological and scriptural implications In this book I will endeavor to challenge the masks of masculinities and dismantle several mental models that foment a gender divide in Christ like leadership in the twenty first century
