Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and disability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production *Pathways of Power* Timothy J. Conlan, Paul L. Posner, David R. Beam, 2014-03-05 While civics textbooks describe an idealized model of how a bill becomes law journalists often emphasize special interest lobbying and generous campaign contributions to Congress and other textbooks describe common stages through which all policies progress these approaches fail to convey much less explain the tremendous diversity in political processes that shape specific policies in contemporary Washington Bridging the

gap between textbook models of how public policy should work and how the process actually works in contemporary Washington *Pathways of Power* provides a framework that integrates the roles of political interests and policy ideals in the contemporary policy process This book argues that the policy process can be understood as a set of four distinctive pathways of policymaking pluralist partisan expert and symbolic that draw upon different political resources appeal to different political actors and elicit unique strategies and styles of coalition building Revealing the strategic behavior of policy actors who compete to shift policies onto pathways that maximize their resources and influence the book provides a fresh approach to understanding the seeming chaos and volatility of the policy process today The book s use of a wide universe of major policy decisions and case studies focused on such key areas as health care federal budgeting and tax policy provides a useful foundation for students of the policy process as well as for policy practitioners eager to learn more about their craft
