Numerical Solution of Initial-value Problems in Differential-algebraic Equations K. E. Brenan, S. L. Campbell, L. R. Petzold, 1996-01-01 Many physical problems are most naturally described by systems of differential and algebraic equations This book describes some of the places where differential algebraic equations DAE s occur The basic mathematical theory for these equations is developed and numerical methods are presented and analyzed Examples drawn from a variety of applications are used to motivate and illustrate the concepts and techniques This classic edition originally published in 1989 is the only general DAE book available It not only develops guidelines for choosing different numerical methods it is the first book to discuss DAE codes including the popular DASSL code An extensive discussion of backward differentiation formulas details why they have emerged as the most popular and best understood class of linear multistep methods for general DAE s New to this edition is a chapter that brings the discussion of DAE software up to date The objective of this monograph is to advance and consolidate the existing research results for the numerical solution of DAE s The authors present results on the analysis of numerical methods and also show how these results are relevant for the solution of problems from applications They develop guidelines for problem formulation and effective use of the available mathematical software and provide extensive references for further study

Research and Practice on the Theory of Inventive Problem Solving (TRIZ) Leonid Chechurin, 2016-09-12 This book clarifies the common misconception that there are no systematic instruments to support ideation heuristics and creativity Using a collection of articles from professionals practicing the Theory of Inventive Problem Solving TRIZ this book presents an overview of current trends and enhancements within TRIZ in an international context and shows its different roles in enhancing creativity for innovation in research and practice Since its first introduction by Genrikh Saulovich Altshuller in 1956 in the USSR the TRIZ method has been widely used by inventors design engineers and has become a standard element of innovation support tools in many Fortune 500 companies However TRIZ has only recently entered the domain of scientific publications and discussion This collection of articles is meant as a record of scientific discussion on TRIZ that reflects the most interesting talking points research interests results and expectations Topics such as Creative and Inventive Design Patent Mining and Knowledge Harvesting are also covered in this book

Elementary Differential Equations and Boundary Value Problems William E. Boyce, Richard C. DiPrima, Douglas B. Meade, 2021-10-19 Elementary Differential Equations and Boundary Value Problems 12th Edition is written from the viewpoint of the applied mathematician whose interest in differential equations may sometimes be quite theoretical sometimes intensely practical and often somewhere in between In this revision new author Douglas Meade focuses on developing students conceptual understanding with new concept questions and worksheets for each chapter Meade builds upon Boyce and DiPrima's work to combine a sound and accurate but not abstract exposition of the elementary theory of differential equations with considerable material on methods of solution analysis and approximation that have proved useful in a wide variety of applications The main prerequisite for engaging with the program is a working knowledge of calculus gained from a normal two or three semester course sequence or its equivalent Some familiarity with matrices will also be helpful in the chapters on systems of differential equations
