Foundations of Airport Economics and Finance Hans-Arthur Vogel, 2019-03-22 Foundations of Airport Economics and Finance analyzes the impact

key economic indicators play on an airport's financial performance. As rapidly changing dynamics including liberalization, commercialization, and globalization are changing the nature of airports worldwide, this book presents the significant challenges facing current and future airports. Airports are evolving from quasi-monopolies to commercial companies operating in a global environment with ever-increasing passenger and cargo volumes and escalating security costs that put a greater strain on airport systems. This book highlights the critical changes that airports are experiencing, providing a basic understanding of both the economic and financial aspects of the air transport industry.

The 22 chapters are intended to fit comfortably into a single semester course with two weekly classes. The authors cover key topics including conducting body alignment, breathing, the conducting box, baton use, cutoffs, left hand use, conducting patterns, conducting styles, conducting subdivisions, accents, syncopation, score preparation and score reading, transpositions, and clef reading. Ensemble familiarity, error detection, rehearsal planning, and rehearsal techniques are also covered. This textbook and its accompanying supplemental materials are uniquely designed for the instructor to achieve an efficient and readily organized class and for the students to receive essential fundamental conducting skills on both instrumental, including orchestral and band instruments, and choral ensembles. Addressing the conductor's role, basic conducting skills, makeup of instrumental and choral ensembles, and solutions to common issues, the text prepares all students to engage in higher-level conducting courses.

A Musicology of Performance Dorottya Fabian, 2015-08-17. This book examines the nature of musical performance. In it, Dorottya Fabian explores the contributions and limitations of some of these approaches to performance, be they theoretical, cultural, historical, perceptual, or analytical. Through a detailed investigation of recent recordings of J.S. Bach's Six Sonatas and Partitas for Solo Violin, she demonstrates that music performance functions as a complex dynamical system. Only by crossing disciplinary boundaries, therefore, can we put the aural experience into words. *A Musicology of Performance* provides a model for such a method by adopting Deleuzian concepts and various empirical and interdisciplinary procedures. Fabian provides a case study in the repertoire while presenting new insights into the state of baroque performance practice at the turn of the twenty-first century. Through its wealth of audio examples, tables, and graphs, the book offers both a sensory and a scholarly account of musical performance. These interactive elements map the connections between historically informed and mainstream performance styles, considering them in relation to broader cultural trends, violin schools, and individual artistic trajectories. *A Musicology of Performance* is a must-read for academics and postgraduate students and an essential reference point for the study of music performance, the early music movement, and Bach's opus.
