The total length of the vent system including straight vent, elbow(s), transitions and wall or roof caps must not exceed the equivalent of 140 ft (42.7 m) for either type of vent.

Outside ventilation requires a HOOD EXHAUST DUCT. Read the following carefully.

## CABINET OPENING DIMENSIONS

### NOTES:

- The space between the cabinets must be 30" (76.2 cm) wide and free of obstructions.
- This microwave oven is for installation over ranges up to 33" (83.8 cm) wide.
- If you are going to vent your microwave oven to the outside, see Venting Requirements for exhaust duct preparation.
- When installing the microwave oven beneath smooth flat cabinets be careful to follow the instructions on the top cabinet template for power cord clearance.

**NOTE:** It is important that venting be installed using the most direct route and with as few elbows as possible. This ensures clear venting of exhaust and helps prevent blockages. Also, make sure dampers swing freely and nothing is blocking the ducts.

For best performance, use no more than three 90° elbows.

To calculate the length of the system you need, add the equivalent length for each vent piece used in the system. See the following examples:
