early and late pregnancy and the immediate postnatal period. These are all situations that the pre-hospital practitioner may attend. This text and the accompanying integrated on-line and hands-on course will help practitioners identify and manage a range of time-critical obstetric emergencies specifically in the pre-hospital setting and provides a structured examination and assessment technique as an aid to determining what treatments should be provided before transport as well as when and how urgently transport should be initiated. POET is of relevance to paramedics, ambulance staff, doctors and nurses working in the emergency pre-hospital setting and to midwives facilitating home births. It will also be of considerable value to medical and nursing practitioners working in Emergency Departments and unscheduled care settings where immediate access to skilled obstetric assistance is not available.
