America's Shadow William V. Spanos, 2000 A study of imperialism that stretches from ancient Rome to the post Cold War World this provocative work boldly revises our assumptions about the genealogy of the West Rather than locating its source in classical Greece William V

Spanos argues we should look to ancient Rome which first articulated the ideas that would become fundamental to the West's imperial project. These founding ideas he claims have informed the American national identity and its foreign policy from its origins. The Vietnam War is at the center of this book. In the contradiction between the free world logic employed to justify U.S. intervention in Vietnam and the genocidal practices used to realize that logic, Spanos finds the culmination of an imperialistic discourse reaching back to the colonizing rationale of the Roman Empire. Spanos identifies the language of expansion in the white metaphors in Western philosophical discourse since the colonization of Greek thought by the Romans. He shows how these metaphors and their role in metaphysical discourse have long been complicit in the violence of imperialism.

The Cambridge Companion to Transnational American Literature Yogita Goyal, 2017-02-15 This book provides a new map of American literature in the global era analyzing the multiple meanings of transnationalism

American Exceptionalism in the Age of Globalization William V. Spanos, 2008-01-24 In *American Exceptionalism in the Age of Globalization* William V. Spanos explores three writers: Graham Greene, Philip Caputo, and Tim O'Brien, whose work devastatingly critiques the U.S. intervention in Vietnam and exposes the brutality of the Vietnam War. Utilizing poststructuralist theory, particularly that of Heidegger, Althusser, Foucault, and Said, Spanos argues that the Vietnam War disclosed the dark underside of the American exceptionalist ethos and, in so doing, speaks directly to America's war on terror in the aftermath of 9/11. To support this argument, Spanos undertakes close readings of Greene's *The Quiet American*, Caputo's *A Rumor of War*, and O'Brien's *Going After Cacciato*, all of which bear witness to the self-destruction of American exceptionalism. Spanos retrieves the spectral witness that has been suppressed since the war but that now, in the wake of the quagmire in Iraq, has returned to haunt America's post-9/11 project for the new American century.

Empires Susan E. Alcock, 2001-08-09 *Empires* the largest political systems of the ancient and early modern world powerfully transformed the lives of people within and even beyond their frontiers in ways quite different from other non-imperial societies. Appearing in all parts of the globe and in many different epochs, empires invite comparative analysis, yet few attempts have been made to place imperial systems within such a framework. This book brings together studies by distinguished scholars from diverse academic traditions including anthropology, archaeology, history, and classics. The empires discussed include case studies from Central and South America, the Mediterranean, Europe, the Near East, South East Asia, and China, and range in time from the first millennium BC to the early modern era. The book organizes these detailed studies into five thematic sections: sources, approaches, and definitions; empires in a wider world; imperial integration and imperial subjects; imperial ideologies; and the afterlife of empires.
