AS AMERICA and the world grapple with the consequences of global environmental change, writer and activist Bill McKibben offers this unprecedented, inspiring, and timely anthology gathering the best and most significant American environmental writing from the last two centuries. "Each advance in environmental practice" in our nation's history, McKibben observes in his introduction, "was preceded by a great book." Here, for the first time in a single volume, are the words that made a movement.

Classics of the environmental imagination—the essays of Henry David Thoreau, John Muir, and John Burroughs; Aldo Leopold's *A Sand County Almanac*; Rachel Carson's *Silent Spring*—are set alongside an emerging activist movement, revealed by newly uncovered reports of pioneering campaigns for conservation, passages from landmark legal opinions and legislation, and soaring protest speeches. American Earth Bill McKibben, 2008 Author and activist McKibben gathers the essential American writings that changed the way the public looks at the natural world *American Earth* features essays by Walt Whitman Rachel Carson Barbara Kingsolver Michael Pollan and dozens more *From the Tourist's Gaze* Pietro Agnoletto, 2025-06-27 *From the Tourist's Gaze* bridges environmental humanities and amateur cinema studies exploring tourism induced environmental issues through the visual representations created by tourists themselves The protagonists of the book are families from North West Italy and their holiday films captured during their holidays in the Ligurian Riviera The timeframe spans between the 1950s and 1970s the so called Italian economic miracle a period in which Italy experienced an extraordinary and rapid economic growth and consequentially a rise in living standards including tourism and film cameras accessibility Radical environmental transformations such as the industrialization and cementing of spaces or the conversion of entire coastlines into territories equipped to receive masses of tourists were just one of the consequences studied from a myriad of sources but never through amateur films The most illustrative case is the Ligurian Riviera which has been regarded as an example of land consumption since those contemporary years Despite being centered on a specific case study readers will be equipped with practical tools to enhance their study of historical amateur films These tools are introduced through innovative methodological approaches to archival research and visual analysis The results will highlight the visual imagery of mid 20th century tourists and their perspectives on the destinations they visited offering fresh visually oriented insights that contribute to the field of tourism studies As a visual journey through mid 20th century Italian tourism and its environmental narratives it may interest cultural geographers tourism and media scholars and the broader group of environmental humanists the latter will have the opportunity to explore amateur cinema as an untapped resource for understanding cultural narratives while amateur cinema scholars will have an example of a fresh and different approach to their subject It can also give new insights to archivists specialized in home movies and be appealing to scholars and intellectuals interested in these topics **Nature and the Environment in Amish Life** David L. McConnell, Marilyn D. Loveless, 2018-11-01 The Amish relationship to the environment is much more complicated than you might think The pastoral image of Amish communities living simply and in touch with the land strikes a deep chord with many Americans Environmentalists have lauded the Amish as iconic models for a way of life that is local self sufficient and in harmony with nature But the Amish themselves do not always embrace their ecological reputation and critics have long questioned the portrayal of the Amish as models of environmental stewardship In *Nature and the Environment in Amish Life* David L McConnell and Marilyn D Loveless examine how this prevailing notion of the environmentally conscious Amish fits with the changing realities of their lives Drawing on 150 interviews conducted over the course of 7 years as well as a survey of household resource use among Amish and non Amish people they explore how the Amish understand nature in their daily lives and how their actions impact the natural

world Arguing that there is considerable diversity in Amish engagements with nature at home at school at work and outdoors McConnell and Loveless show how the Amish response to regional and global environmental issues such as watershed pollution and climate change reveals their deep skepticism of environmentalists They also demonstrate that Amish households are not uniformly lower in resource use compared to their rural non Amish neighbors though aspects of their home economy are relatively self sufficient The first comprehensive study of Amish understandings of the natural world this compelling book complicates the image of the Amish and provides a more realistic understanding of the Amish relationship with the environment

Lafcadio Hearn: American Writings (LOA #190) Lafcadio Hearn, 2009-03-05 The writings of Hearn s American years reveal an omnivorous curiosity and an always eclectic sensibility *Some Chinese Ghosts* 1887 is a stylized retelling of ancient legends foreshadowing Hearn s later fascination with Asian themes The exquisitely crafted novels *Chita* 1889 about the devastation wrought by a Louisiana hurricane and *Youma* 1890 about a slave rebellion in Martinique epitomize his writing at its most luxuriantly romantic His extraordinary travel book *Two Years in the French West Indies* 1890 provides a richly impressionistic account of his long stay on Martinique and other Caribbean islands
