Learning Through Teaching Mathematics Roza Leikin, Rina Zazkis, 2010-04-10 The idea of teachers Learning through Teaching LTT when presented to a naïve bystander appears as an oxymoron Are we not supposed to learn before we teach After all under the usual circumstances learning is the task for those who are being taught not of those who teach However this book is about the learning of teachers not the learning of students It is an ancient wisdom that the best way to truly learn something is to teach it to others Nevertheless once a teacher has taught a particular topic or concept and consequently truly learned it what is left for this teacher to learn As evident in this book the experience of teaching presents teachers with an exciting opportunity for learning throughout their entire career This means acquiring a better understanding of what is being taught and moreover learning a variety of new things What these new things may be and how they are learned is addressed in the collection of chapters in this volume LTT is acknowledged by multiple researchers and mathematics educators In the first chapter Leikin and Zazkis review literature that recognizes this phenomenon and stress that only a small number of studies attend systematically to LTT processes The authors in this volume purposefully analyze the teaching of mathematics as a source for teachers own learning Technology-Based Education Lisa M. Pytlik Zillig, Mary Bodvarsson, Roger Bruning, 2006-05-01 This volume will highlight papers presented at the second Nebraska Symposium on Information

Technology in Education With chapters focusing on the latest research findings and theoretical principles for using technology in education the volume will extend findings from current research on technology mediated instruction into a set of practical principles for designers teachers and managers of educational technology Contributors will identify technical and design features required for sharing of content and assessment tools and will target promising areas for future research and development in technology based learning instruction and assessment **Prentice Hall Middle Grades Math: Course 2**, 1999 **Student Solutions Manual to Accompany Linear Algebra with Applications** Gareth Williams, 2010-03-18
