Algebra William G. McCallum, Eric Connally, Deborah Hughes-Hallett, 2014-11-25 Algebra Form and Function was designed based on the fundamental goal for a student to foster understanding of algebraic structure that is an understanding of how the arrangements of symbols allows us to predict for example the behavior of a function or the number of solutions to an equation Mastering algebraic structure enables students to read algebraic expressions and equations in real life contexts not just manipulate them and to choose which form or which operation will best suit the context It facilitates being able to translate back and forth between symbolic graphical numerical and verbal representations By balancing practice in manipulation and opportunities to see the big picture Algebra Form and Function offers a way for teachers to help students achieve real mastery of algebra

Algebra-1: Course in Mathematics for the IIT-JEE and Other Engineering Entrance Examinations, *Large-Scale Studies in Mathematics Education* James A. practical considerations Further automated test assembly is elaborated for the conventional linear tests from both classical test theory and item response theory perspectives Item pool design and assembly for the linear on the fly tests elaborates more complications in practice when test security is a big concern Finally several chapters focus on computerized adaptive testing CAT at either item or module levels CAT is further illustrated as an effective approach to increasing test takers engagement in testing In summary the book includes both theoretical methodological and applied research and practices that serve as the foundation for future development These chapters provide illustrations of efforts to automate the process of test development While some of these automation processes have become common practices such as automated test assembly automated scoring and computerized adaptive testing some others such as automated item generation calls for more research and exploration When new AI methods are emerging and evolving it is expected that researchers can expand and improve the methods for automating different steps in test development to enhance the automation features and practitioners can adopt quality automation procedures to improve assessment practices *Journal of Developmental Education*, 2007
