

Alka Seltzer Strength

Lab Report

This experiment explores the chemistry behind common antacids and treatment for heartburn. This lab continues to build on the concept of stoichiometry and limiting reactant explored in previous labs. It also uses the Law of Conservation of Mass to quantitatively (with numbers and measurements) study the amount of substance used and produced in a chemical reaction.

After performing the lab, finding the limiting reactant, and determining the maximum amount of carbon dioxide produced, you will be able to calculate the mass percent of the active ingredient in a tablet of Alka Seltzer.
