Marlin-Bennett, 2012-03-12 International Relations have rarely been considered a synthesis of humanistic and social sciences approaches to understand the complex connections of a global and globalizing world One of the few scholars to have accomplished this creative blend was Hayward R Alker Alker and IR presents a set of visionary and original essays from scholars who have been profoundly influenced by Alker's approach to global studies They build on the foundation he laid demonstrating the practicality and usefulness of ethically grounded theoretically informed and interdisciplinary research for producing knowledge They show how substantive boundaries can be crossed and methodological rules rewritten in the search for a deeper more contextualized approach to global politics This book will be of interest to researchers and students of international relations and global politics *China in the UN Security Council Decision-making on Iraq* Suzanne Xiao

Yang, 2013 With the rupture of the UN Security Council in March 2003 over the US spearheaded intervention in Iraq the attempts made to subject the use of force to the rule of law had failed Widespread European US disagreement of the role of the UNSC has hindered more effective decisions for China and its European and American counterparts in the Security Council Iraq China and the UN Security Council examines the role of China's policy behaviour in relation to the Iraq intervention in order to develop a better understanding of this fast rising power within the UN It looks at key questions such as What consequences may arise if China's actions are based on a set of values and national interests far removed from those of the major Western powers Could China's attitude disrupt the traditional working and normative practice of the United Nations The book will be of interest to scholars and students of international relations and Chinese Politics **NATO's Security**

Discourse After the Cold War Andreas Behnke, 2013 This book provides a critical investigation into the discursive processes through which the North Atlantic Treaty Organisation NATO reproduced a geopolitical order after the end of the Cold War and the demise of its constitutive enemy the Soviet Union **Border Politics** Cengiz Günay, Nina

Witjes, 2016-12-09 In the light of mass migration the rise of nationalism and the resurgence of global terrorism this timely volume brings the debate on border protection security and control to the centre stage of international relations research

Rather than analysing borders as mere lines of territorial demarcation in a geopolitical sense it sheds new light on their changing role in defining and negotiating identity authority security and social and economic differences Bringing together innovative and interdisciplinary perspectives the book examines the nexus of authority society technology and culture while also providing in depth analyses of current international conflicts Regional case studies comprise the Ukraine crisis Nagorno Karabakh the emergence of new territorial entities such as ISIS and maritime disputes in the South China Sea as well as the contestation and re construction of borders in the context of transnational movements Bringing together theoretical empirical and conceptual contributions by international scholars this Yearbook of the Austrian Institute for International Affairs offers novel perspectives on hotly debated issues in contemporary politics and will be of interest to researchers graduate students and political decision makers alike

Power, Realism and Constructivism Stefano Guzzini, 2013-03-20 Framed by a new and substantial introductory chapter this book collects Stefano Guzzini's reference articles and some less well known publications on power realism and constructivism By analysing theories and their assumptions but also theorists following their intellectual paths his analysis explores the diversity of different schools and moves beyond simple definitions to explore their intrinsic tensions and fallacies Guzzini's approach to the analysis of power within and outside International Relations provides the common theme of the book through which the theoretical state of the art in IR is reassessed A novel analysis of power and the potential limits of realism and constructivism in International Relations Power Realism and Constructivism will be of interest to students and scholars of international relations international political economy social and political theory and the study of power

Justice, Order and Anarchy Alex Prichard, 2013-05-02 This book provides a contextual account of the first anarchist theory of war and peace and sheds new light on our contemporary understandings of anarchy in International Relations Although anarchy is arguably the core concept of the discipline of international relations scholarship has largely ignored the insights of the first anarchist Pierre Joseph Proudhon Proudhon's anarchism was a critique of the projects of national unification universal dominion republican statism and the providentialism at the heart of enlightenment social theory While his break with the key tropes of modernity pushed him to the margins of political theory Prichard links Proudhon back into the republican tradition of political thought from which his ideas emerged and shows how his defence of anarchy was a critique of the totalising modernist projects of his contemporaries Given that we are today moving beyond the very statist processes Proudhon objected to his writings present an original take on how to institutionalise justice and order in our radically pluralised anarchic international order Rethinking the concept and understanding of anarchy Justice Order and Anarchy will be of interest to students and scholars of political philosophy anarchism and international relations theory

European Integration and Postcolonial Sovereignty Games Rebecca Adler-Nissen, Ulrik Gad, 2013-05-02 This book examines how sovereignty works in the context of European integration and postcolonialism Focusing on a group of micro polities associated with the European Union it offers a new understanding of international

relations in the context of modern sovereignty This book offers a systematic and comparative analysis of the Overseas Countries and Territories OCTs the EU and the four affected Member States UK France the Netherlands and Denmark Contributors explore how states and state like entities play sovereignty games to understand how a group of postcolonial entities may strategically use their ambiguous status in relation to sovereignty The book examines why former colonies are seeking greater room to manoeuvre on their own whilst simultaneously developing a close relationship to the supranational EU Methodologically sophisticated this interdisciplinary volume combines interviews participant observation textual legal and institutional analysis for a new theoretical approach to understanding the strategic possibilities and subjectivity of non sovereign entities in international politics Bringing together research on European integration and postcolonial theory European Integration and Postcolonial Sovereignty Games will be of interest to students and scholars of International Relations EU studies Postcolonial studies International Law and Political Theory **Emancipatory International**

Relations Roger D. Spegele, 2014-05-23 International relations theory is witnessing a veritable explosion of works within the areas of modernism and postmodernism yet there has been no attempt to compare these theories and their sources according to a common criterion or logical form This author argues that while these pioneering imaginative and exciting theoretical works are disparate they also share a common thread that seeks to express emancipatory goals for international relations This book provides an in depth critical study of this genre of theorizing that he names Emancipatory International Relations Spegele develops a framework to help the reader understand both the differences and commonalities in modernist and postmodernist emancipatory thinking in International Relations He critically analyzes modernist theories discourses narratives and postmodernist theory and practice feminist emancipatory discourses and postmodernist international discourse and concludes by examining the coherence viability and plausibility of emancipatory discourses in international relations whether modernist or postmodernist This challenging and innovative volume will be of interest to students and researchers of international relations The Art of World-Making Harry Gould, 2017-06-26 On its face The Art of World Making focuses on honouring the career of Nicholas Greenwood Onuf and his contributions to the study of international relations of equal importance however while using Onuf s work as their touchstone the contributions to this volume range widely across IR theory making important interventions in some of the most important topics in the field today The volume considers the place of Constructivism and Republicanism in the field of international relations and the contestation that accompanies the question of their place in the field asking What explains the dominance of some forms of Constructivism and the relative lack of influence of other forms What can rule oriented Constructivism the focus here provide our field that other forms of Constructivism have been unable to Into what new and productive directions can Constructivism be taken What are its gaps and what are the resources to remedy those gaps What can Republicanism tell us about ongoing issues in international law global governance liberalism and crisis Drawing together essays from some of the leading scholars in the

field space is given after each chapter for a detailed and highly personal response piece to each contribution written by Onuf

This unique volume will be essential reading for students and scholars of international relations **Bourdieu in International Relations** Rebecca Adler-Nissen, 2013 This book rethinks the key concepts of International Relations by drawing on the work of Pierre Bourdieu The last few years have seen a genuine wave of publications promoting sociology in international relations Scholars have suggested that Bourdieu's vocabulary can be applied to study security diplomacy migration and global environmental politics Yet we still lack a systematic and accessible analysis of what Bourdieu inspired IR might look like This book provides the answer It offers an introduction to Bourdieu's thinking to a wider IR audience challenges key assumptions which currently structure IR scholarship and provides an original theoretical restatement of some of the core concepts in the field The book brings together a select group of leading IR scholars who draw on both theoretical and empirical insights from Bourdieu Each chapter covers one central concept in IR Methodology Knowledge Power Strategy Security Culture Gender Norms Sovereignty and Integration The chapters demonstrate how these concepts can be reinterpreted and used in new ways when exposed to Bourdieusian logic Challenging key pillars of IR scholarship Bourdieu in International Relations will be of interest to critical theorists and scholars of IR theory Critical Approaches to Security Laura J. Shepherd, 2013 Focusing on critical approaches to security this new textbook offers readers both an overview of the key theoretical perspectives and a variety of methodological techniques With a careful explication of core concepts in each chapter and an introduction that traces the development of critical approaches to security this textbook will encourage all those who engage with it to develop a curiosity about the study and practices of security politics Challenging the assumptions of conventional theories and approaches unsettling that which was previously taken for granted these are among the ways in which such a curiosity works Through its attention to the fact that and the ways in which security matters in global politics this work will both pioneer new ways of studying security and acknowledge the noteworthy scholarship without which it could not have been thought This textbook will be essential reading to advanced undergraduate and postgraduate students of critical security studies and highly recommended to students of traditional security studies International Relations and Politics **Semantics of Statebuilding** Nicolas Lemay-Hébert, Nicholas Onuf, Vojin Rakić, Petar Bojanić, 2013-12-04 This volume examines international statebuilding in terms of language and meanings rather than focusing narrowly on current policy practices After two decades of evolution towards more integrated multi faceted or simply stated more intrusive statebuilding and peacebuilding operations a critical literature has slowly emerged on the economic social and political impacts of these interventions Scholars have started to analyse the unintended consequences of peacebuilding missions analysing all aspects of interventions Central to the book is the understanding that language is both the most important tool for building anything of social significance and the primary repository of meanings in any social setting Hence this volume exemplifies how the multiple realities of state state fragility and statebuilding are being

conceptualised in mainstream literature by highlighting the repercussions this conceptualisation has on good practices for statebuilding Drawing together leading scholars in the field this project provides a meeting point between constructivism in international relations and the critical perspective on liberal peacebuilding shedding new light on the commonly accepted meanings and concepts underlying the international or world order as well as the semantics of contemporary statebuilding practices This book will be of much interest to students of statebuilding and intervention war and conflict studies security studies and international relations The Regional Security Puzzle around Afghanistan Helena

Rytövuori-Apunen,2016-05-23 Western military presence wanes in Afghanistan and a transformed security environment challenges borders and stability in Central Asia This book examines how the tensions relating to the reorganization of external military presence interact with regional states ambitions and challenge the borders already contested by numerous dividing lines It studies a complex political landscape across which radical Islam connected with international terrorism is feared to spread as the international mission initiated in the wake of the 9 11 attacks winds down The Oxford Handbook of Music Listening in the 19th and 20th Centuries Christian Thorau,Hansjakob Ziemer,2019 An idealized image of European concert goers has long prevailed in historical overviews of the nineteenth and twentieth centuries This act of listening was considered to be an invisible and amorphous phenomenon a naturally given mode of perception This narrative influenced the conditions of listening from the selection of repertoire to the construction of concert halls and programmes However as listening moved from the concert hall to the opera house street music and jazz venues new and visceral listening traditions evolved In turn the art of listening was shaped by phenomena of the modern era including media innovation and commercialization This Handbook asks whether how and why practices of music listening changed as the audience moved from pleasure gardens and concert venues in the eighteenth century to living rooms in the twentieth century and mobile devices in the twenty first Through these questions chapters enable a differently conceived history of listening and offer an agenda for future research **International Orders in the Early Modern World** Shogo Suzuki,Yongjin Zhang,Joel

Quirk,2013-09-05 This book examines the historical interactions of the West and non Western world and investigates whether or not the exclusive adoption of Western oriented international norms is the prerequisite for the construction of international order This book sets out to challenge the Eurocentric foundations of modern International Relations scholarship by examining international relations in the early modern era when European primacy had yet to develop in many parts of the globe Through a series of regional case studies on East Asia the Middle East Africa and Latin America and Russia written by leading specialists of their field this book explores patterns of cross cultural exchange and civilizational encounters placing particular emphasis upon historical contexts The chapters of this book document and analyse a series of regional international orders that were primarily defined by local interests agendas and institutions with European interlopers often playing a secondary role These perspectives emphasize the central role of non European agency in shaping global history and

stand in stark contrast to conventional narratives revolving around the Rise of the West which tend to be based upon a stylized contrast between a dynamic West and a passive and static East Focusing on a crucial period of global history that has been neglected in the field of International Relations International Orders in the Early Modern World will be interest to students and scholars of international relations international relations theory international history early modern history and sociology International Relations and the First Great Debate Brian Schmidt,2013-08-15 This book provides an authoritative account of the controversy about the first great debate in the field of International Relations Of all the self images of International Relations none is as pervasive and enduring as the notion that a great debate pitting idealists against realists took place in the 1940s The story of the first great debate continues to structure the contemporary identity of International Relations yet in recent years revisionist historians have challenged the conventional wisdom that the field experienced such a debate Drawing on expert contributors working in Canada Europe the United Kingdom and the United States this book includes key participants in the historiographical controversy The book assembles the existing scholarship and provides a thorough analysis of the status of the first great debate in the history of International Relations It is an invaluable examination of the causes and future direction of idealist and realist arguments International Relations and the First Great Debate will be of interest to students and scholars concerned with the foundations of International Relations

The Globalization of International Society Timothy Dunne,Christian Reus-Smit,2017 This volume reconsiders the process of globalization drawing on a wealth of new perspectives to understand better this momentous historical development Africa and the Expansion of International Society John Anthony Pella, Jr,2014-08-21 This book explores the West Central African role in and experience during the expansion of international society Building upon theoretical contributions from the English School of international relations historical sociology and sociology it departs from Euro centric assumptions by analysing how West Central Africa and West Central Africans were integral to the ways in which Europe and Africa came together from the fifteenth century through to the twentieth Initially diverse scholarship concerned with the expansion of international society is examined revealing how the process has often been understood as one dictated by Europeans From there a new approach is developed one which is better able to examine the expansion as an interactive process between individuals and which puts the African experience at the heart of study The empirical research that follows this draws upon primary sources to introduce a number of historically significant and ground breaking cases into international relations including the international relations of West Central Africa before the European arrival the emergence and growth of the trans Atlantic slave trade the attempts to civilize Africa and the scramble to colonize Africa This book argues that the expansion of international society was driven by individual interaction and was shaped by both Africans and Europeans This book will be of interest to students and scholars of international relations international relations theory history African politics the English school and constructivism Author John Anthony Pella introduces his book African and the

Expansion of International Society Surrendering the Savannah http://www.routledge.com/politics/articles/featured_author_john_anthony_pella **The Dao of World Politics** L. H. M. Ling, 2013-10-30 This book draws on Daoist yin yang dialectics to move world politics from the current stasis of hegemony hierarchy and violence to a more balanced engagement with parity fluidity and ethics The author theorizes that we may develop a richer more representative approach towards sustainable and democratic governance by offering a non Western alternative to hegemonic debates in IR The book presents the story of world politics by integrating folk tales and popular culture with policy analysis It does not exclude current models of liberal internationalism but rather brackets them for another day another purpose The deconstruction of IR as a singular unifying school of thought through the lens of a non Westphalian analytic shows a unique perspective on the forces that drive and shape world politics This book suggests new ways to articulate and act so that global politics is more inclusive and less coercive Only then the book claims could IR realize what the dao has always stood for a world of compassion and care The Dao of World Politics bridges the humanities and social sciences and will be of interest to scholars and students of the global international as well as policymakers and activists of the local domestic
