Education Reforms in Ghana G. M. Osei, 2010 The decision to undertake this research was a pragmatic response to the debates which followed the introduction of a new innovative secondary education system in Ghana This book investigates the innovation during its formation since 1974 inception from 1987 and in respect of field research aspects of its operation from 1998 to 2002 The primary aim of the research was to monitor the implementation processes in as many aspects as possible This was done in order to see what benefits might be gained and what lessons in order to continue the innovation In order to conduct this assessment it was necessary to examine critically the characteristics of each element of the reform and their implications using a variety of research methods to generate relevant data This approach yielded a substantial amount of original evidence on the dynamics of educational change While this evaluation specifically helps to deepen understanding of the said innovation it also makes a contribution to the literature on educational innovation in developing countries

Security and Applications brings together scientific research in distributed network intelligence security and novel applications. The book presents recent trends and advances in the theory and applications of network intelligence and helps you understand how to successfully incorporate them into distributed systems and services. Featuring contributions by leading scholars and experts from around the world, this collection covers:

- Approaches for distributed network intelligence
- Distributed models for distributed enterprises including forecasting and performance measurement models
- Security applications for distributed enterprises including intrusion tackling and peer to peer traffic detection
- Future wireless networking scenarios including the use of software sensors instead of hardware sensors
- Emerging enterprise applications and trends such as the smartOR standard and innovative concepts for human machine interaction in the operating room

Several chapters use a tutorial style to emphasize the development process behind complex distributed networked systems and services which highlights the difficulties of knowledge engineering of such systems. Delving into novel concepts, theories and advanced technologies, this book offers inspiration for further research and development in distributed computing and networking especially related to security solutions for distributed environments.
