is inspired by Jacques Derrida and by his seminal work *The Margins of Philosophy* The study of meaning in the past thirty years has focused on core meaning and largely ignored the margins of meaning where much of the power of language is to be found The present work seeks to shift this focus by taking a postmodern approach that sees meaning as an accretion of verbal social cultural and personal sign systems with fluid boundaries that shrink or expand with each meaner Chapter 1 begins with a brief examination of present day approaches to meaning and goes on to a deconstruction of four twentieth

century linguists Chapter 2 takes as its starting point two aspects of the 20th century scientific paradigm non deterministic causation and relativity and considers a number of thinkers who have worked within this paradigm A major aim of this work is to convince students and teachers of literary theory cultural studies and feminist theory of the validity of a linguistics of indeterminacy so Chapter 3 focuses on an analytical approach that models indeterminacy in language and Chapter 4 applies the model to a newspaper editorial a Wallace Stevens poem and an extract from a Patrick White novel **British Medical Journal** ,1895
