From the makers of the ACT test Cover **Computer Algebra in Scientific Computing** V.G. Ganzha, E.W. Mayr, E.V. Vorozhtsov, 2007-09-12

This book constitutes the refereed proceedings of the 10th International Workshop on Computer Algebra in Scientific Computing CASC 2007 held in Bonn, Germany, in September 2007. The volume is dedicated to Professor Vladimir P. Gerdt on the occasion of his 60th birthday. The 35 revised full papers presented were carefully reviewed and selected from numerous submissions for inclusion in the book. The papers cover not only various expanding applications of computer algebra to scientific computing but also the computer algebra systems themselves and the CA algorithms. Topics addressed are studies in polynomial and matrix algebra, quantifier elimination and Gröbner bases as well as stability investigation of both differential equations and difference methods for them. Several papers are devoted to the application of computer algebra methods and algorithms to the derivation of new mathematical models in biology and in mathematical physics.

Spectral Measures and Dynamics: Typical Behaviors Moacir Aloisio, Silas L. Carvalho, César R. de Oliveira, 2023-10-27 This book convenes and deepens generic results about spectral measures many of them available so far in scattered literature It starts with classic topics such as Wiener lemma Strichartz inequality and the basics of fractal dimensions of measures progressing to more advanced material some of them developed by the own authors A fundamental concept to the mathematical theory of quantum mechanics the spectral measure relates to the components of the quantum state concerning the energy levels of the Hamiltonian operator and on the other hand to the dynamics of such state However these correspondences are not immediate with many nuances and subtleties discovered in recent years A valuable example of such subtleties is found in the so called Wonderland theorem first published by B Simon in 1995 It shows that for some metric space of self adjoint operators the set of operators whose spectral measures are singular continuous is a generic set which for some is exotic Recent works have revealed that on top of singular continuity there are other generic properties of spectral measures These properties are usually associated with a number of different notions of generalized dimensions upper and lower dimensions with dynamical implications in quantum mechanics ergodicity of dynamical systems and evolution semigroups All this opens ways to new and instigating avenues of research Graduate students with a specific interest in the spectral properties of spectral measure are the primary target audience for this work while researchers

benefit from a selection of important results many of them presented in the book format for the first time
