be organisms living in their depths *Alien Oceans* reveals the science behind the thrilling quest to find out Kevin Peter Hand is one of today's leading NASA scientists and his pioneering research has taken him on expeditions around the world In this captivating account of scientific discovery he brings together insights from planetary science biology and the adventures of scientists like himself to explain how we know that oceans exist within moons of the outer solar system like Europa Titan and Enceladus He shows how the exploration of Earth's oceans is informing our understanding of the potential habitability of these icy moons and draws lessons from what we have learned about the origins of life on our own planet to consider how life could arise on these distant worlds *Alien Oceans* describes what lies ahead in our search for life in our solar system and beyond setting the stage for the transformative discoveries that may await us *The Deep, Wide, and Dark* Dewey D. White, 2011-12-27 Venture into the blackness of space with Dewey D. White's well wrought *The Deep, Wide and Dark* The science is nothing short of sorcery as an extra terrestrial humanoid named John Jay Corsey gives mankind a dimensional boost from Einstein's quantum theory for the love of a twenty year old stripper With science heretofore unknown to humans but which was found to be related to the alien spacecraft that crash landed near Roswell New Mexico Corsey becomes the center of a massive project to build the first faster than light starship to take flight into universa incognita searching for two unearthly elements but quickly more than rocks are found by the newly minted Space Marine Corps Corsey found mankind specifically the U.S. government unprepared but willing to build the machine They jumped right in to the project with the verve and gusto typical of modern man cobbling together human and extra terrestrial science to make it a shining reality On a fenced in 200 sq mile swath of Arizona New Mexico desert Sol Base One is built The nascent masters of the deep wide and dark universal empyrean the Space Marines Corps recruits the best minds and bodies to man the Terrain Explorer the first starship in human history The rush to build it becomes a race as world politics views it as an unwise decision and prepares to stymie the ship's launch after the Space Marines' crafty commandant refuses to reveal the program and its intentions The next decision made is to launch the mission 425 men on board the Terrain Explorer before the U.N. could send in inspection teams And thus the fate of humanity's first venture into the stars is sealed Join Capt Jackson Edison Jed Devlon and the crew of the Terrain Explorer in what promises to be a thrilling masterful exploration of the possibilities of time and space Will they land on earth like worlds such as humanity knows therefore solidifying the fact of infinite replication in the universe Who amongst the extra terrestrial races will they meet and who will be their friend or enemy How will they survive The permutations grip readers with excitement The writing is riveting in detail and shines with crystal clear believability The future is at stake **Are We Alone in the Cosmos? The Search for Alien Contact in the New Millennium** Ben Bova, Byron Preiss, 2010-07-15 Are we alone in this cosmos or do we yet have to come to terms with the actual existence of alien life Never before has so much time and concentrated effort been spent by so many scientists and writers in the pursuit of the answer to this fundamental question In this extraordinary book major scientists involved in the search for
