Miseducation A. J. Angulo, 2016-04-01 A provocative collection that explores how intentional ignorance seeps into formal education Honorable Mention for the PROSE Education Theory Award of the Association of American Publishers Ignorance or the study of ignorance is having a moment Ignorance plays a powerful role in shaping public opinion channeling our politics and even directing scholarly research The first collection of essays to grapple with the historical interplay between education and ignorance Miseducation finds ignorance and its social production through na vet passivity and active agency at the center of many pivotal historical developments Ignorance allowed Americans to maintain the institution of slavery Nazis to promote ideas of race that fomented genocide in the 1930s and tobacco companies to downplay the dangers of cigarettes Today ignorance enables some to deny the fossil record and others to ignore climate science A J Angulo brings together seventeen experts from across the scholarly spectrum to explore how intentional ignorance seeps into formal education Each chapter identifies education as a critical site for advancing our still limited understanding of what exactly ignorance is where it comes from and how it is diffused maintained and regulated in society Miseducation also challenges the notion that schools are ideally unimpeachable sites of knowledge production access and equity By investigating how laws myths national aspirations and global relations have recast and at times distorted the key purposes of education this pathbreaking book sheds light on the role of ignorance in shaping ideas public opinion and policy *Africa: Still Rising?* Giovanni Carbone, 2015-10-30 After decades of unsatisfying performances economic growth took off in many sub Saharan states at the beginning of the 21st century More recently however the end of the commodity cycle particularly with the oil

price drop and the rise of jihadist violence rocked the Emerging Africa boat Is this the beginning of the end for sustained growth in the region This Report investigates the economic impact of these new challenges upon Africa s frontier markets It shows that the positive economic trajectory of recent years is being negatively affected particularly for oil exporting countries However while more caution is needed Africa s growth prospects on the whole remain fairly good at least for now But there is an increasing need to understand the specific risks that individual countries face and the opportunities that they offer as well as to re assess the potential of each specific sector of economic activity The three largest economies in the region Nigeria South Africa and Angola are all under pressure Others including Ethiopia Mozambique and Kenya are still projected to achieve remarkable growth rates

Gooding Jr.,2025-04-21 Despite Hollywood s recent efforts to appeal to more racially diverse audiences mainstream movies routinely present a limited view of non Whites generally and Black women specifically in stark contrast to the broadly developed spectrum of White characters Black women characters are frequently rendered invisible and even in films featuring their image Black women characters too often fall prey to historically stereotypical patterns These consistently marginalized Black female images serve to reflect and reinforce messages of racial imbalance distributed worldwide In Double Crossed Black Female Intersectionality in Hollywood author Frederick W Gooding Jr chronicles the Black female experience through the lens of Hollywood Gooding begins by contextualizing the origins of early Black female imagery on screen largely restricted to the domestic mammy figure then traces how these images have shifted over time Through close readings of such films as Gone with the Wind Bringing Down the House The Princess and the Frog and The Help as well as case studies looking at Oprah Winfrey and Shonda Rhimes Gooding considers not only the image the Black woman creates but also the shadow she casts This volume demonstrates the historical economic and social consequences of Hollywood s distorted representation of Black women on screen and in real life Against Inequality Tom Malleon,2023 In an era of remarkable wealth idolatry

Tom Malleson investigates the ethical justifications of wealth inequality taking the radical position that we should abolish the billionaires Stark inequality is a problem the world over but it has been worsening over the past thirty years particularly in rich economically developed countries To acquire the same amount of wealth as Elon Musk the average American worker would have to work for more than four and a half million years Is this inequality morally acceptable and is it feasible to actually reduce inequality in the real world In *Against Inequality* Tom Malleson makes the case for rejecting meritocracy presenting a strong defense against the claim that individuals deserve their wealth Malleson argues that people especially rich people do not morally deserve the bulk of their income because it does not by and large come from anything the specific individual does but is largely due to the vast understructure of other people's labor in addition to their lucky possession of bodily talents and efforts Furthermore the book brings to light extensive historical and comparative evidence to show that raising taxes on both income and wealth is practically feasible and that the costs of doing so are far outweighed by the truly enormous benefits that such taxes could bring in terms of environmental sustainability democratic equality equal opportunity and reduced racism and xenophobia Unlike previous books on inequality *Against Inequality* focuses on the superrich arguing that they have far too much a world with billionaires alongside severe deprivation is a world without justice Malleson's argument is not that billionaires are individually evil but that a society that allows the existence of the superrich is structurally immoral In an era of remarkable wealth idolatry *Against Inequality* takes the radical position that we should abolish the billionaires

QuantCrit Nichole M. Garcia, Nancy López, Verónica N. Vélez, 2023-05-29 Critical race theory CRT in education centers examines and seeks to transform the relationship that undergirds race racism and power CRT scholars have applied a critical race framework to advance research methodologies in the form of qualitative interventions Informed by this work this book reconsiders the possibilities of CRT applications to quantitative methodologies through QuantCrit This volume posits the question How can quantitative methods long critiqued for their inability to capture the nuance of everyday experience support and further a critical race agenda in educational research It provides a starting point for how QuantCrit principles are employed by interdisciplinary contributions in race and quantitative studies The contributors to the book examine the legacy and genealogy of QuantCrit traditions across disciplines to uncover a rich lineage of methodological possibilities for disrupting racism in research They argue that quantitative approaches cannot be adopted for racial justice aims without an ontological reckoning that considers historical social political and economic power relations Only then can quantitative approach be reimagined and rectified This book will be of interest to researchers and advanced students of Education Sociology Social Work Politics and Racial and Ethnic Studies It was originally published as a special issue of the journal *Race Ethnicity and Education*

Higher Education in Austerity Europe Jon Nixon, 2017-09-21 The financial crisis of 2007-2008 prompted governments across Europe to adopt austerity measures aimed at the reduction of their escalating budget deficits *Higher Education in Austerity Europe* explores how the resulting cuts in public expenditure together with the increasing reliance on the privatisation of services have impacted on higher education directly through the reduction of public sector provision and indirectly as a result of the social and political consequences of that reduction Moreover it explores how the effects of these economic policies have differed markedly across the national regions of Europe with the result that inequality has increased significantly both within and between national regions and this in turn has led to social and political dislocation within and across communities It is only by viewing higher education within this broader context that we can begin to understand the full implications of the austerity measures introduced over the last ten years Jon Nixon draws together leading scholars to delve into the complexity of impact and response generated by these measures Part 1 focuses on cross European perspectives Part 2 on the impact of austerity measures within national systems and Part 3 on new perspectives and possibilities The volume also includes considered responses from outsiders by academics located in Asia Australia and the USA providing an additional dimension to the analysis As well as analysing the full impact of austerity measures across some of the worst hit national regions of Europe the contributors also identify openings and possibilities for renewal
