Monitoring Ecological Condition at Regional Scales Shabeg S. Sandhu, Laura Jackson, Kay Austin, Jeffrey Hyland, Brian D. Melzian, Kevin Summers, 2012-12-06 The Environmental Monitoring and Assessment Program was created by

EPA to develop the capability for tracking the changing conditions of our natural resources and to give environmental policy the advantages of a sound scientific understanding of trends. Former EPA Administrators recognized early that contemporary monitoring programs could not even quantify simple unknowns like the number of lakes suffering from acid rain, let alone determine if national control policies were benefiting these lakes. Today adding to acidification impacts are truly complex problems such as determining the effects of climate change, increases in ultraviolet light, toxic chemicals, eutrophication, and critical habitat loss. Also today the Government Performance and Results Act seeks to have agencies develop performance standards based on results rather than simply on levels of programmatic activities. The charge to EMAP of ecosystems is therefore the same today as it was with respect to measuring the condition a decade ago. We welcome the increasing urgency for sound scientific monitoring methods and data by efforts to protect and improve the environment. Systematic nationwide monitoring of natural resources is more than anyone program can accomplish, however. In an era of declining budgets, it is crucial that monitoring programs at all levels of government coordinate and share environmental data. EMAP resources are dwarfed by the more than 500 million spent on federal monitoring activities each year. Handbook of Principles of Organizational Behavior Edwin Locke, 2011-07-15. There is a strong movement today in management to encourage management practices based on research evidence. In the first volume of this handbook, I asked experts in 39 areas of management to identify a central principle that summarized and integrated the core findings from their specialty area and then to explain this principle and give real business examples of the principle in action. I asked them to write in non-technical terms, e.g., without a lot of statistics, and almost all did so. The previous handbook proved to be quite popular, so I was asked to edit a second edition. This new edition has been expanded to 33 topics and there are some new authors for the previously included topics. The new edition also includes updated case examples, updated references, and practical exercises at the end of each chapter. It also includes a preface on evidence-based management. The principles for the first edition were intended to be relatively timeless, so it is no surprise that most of the principles are the same, though some chapter titles include more than one principle. This book could serve as a textbook in advanced undergraduate and in MBA courses. It could also be of use to practicing managers and not just those in Human Resource departments. Every practicing manager may not want to read the whole book, but I am willing to guarantee that every one will find at least one or more chapters that will be practically useful. In this time of economic crisis, the need for effective management practices is more acute than ever.
