Encyclopedia of Production and Manufacturing Management Paul M. Swamidass, 2006-09-21 The Encyclopedia of
Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the
fundamental reference work Over the past twenty years the field of production and operations management has grown more
rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades
production and manufacturing management absorbed in rapid succession several new production management concepts
manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply
chain management flexible manufacturing systems lean production and mass customization to name a few This explosive
growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did
several decades ago The most notable change has been the need for manufacturing managers to think in technological
strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in
this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management
The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from
five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there
are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to
suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects
Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives
on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly
competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic
innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to
understand and implement these ongoing changes in the field *The AAA Autograph 1996* American Automobile
Association, 1995-12
