Driver Training for Automated Vehicles Siobhán E. Merriman,Katherine L. Plant,Kirsten M. A.

Revell,Neville A. Stanton,2024-04-30 Since the introduction of Automated Vehicles AVs on roads there have been a number of high profile collisions which have highlighted significant driver challenges These include challenges associated with drivers

trust in the automation their knowledge and awareness of the AV's capabilities and limitations and their reduced situation awareness of the road environment and the vehicle. Solutions are needed to overcome these challenges so that the expected benefits of AVs can be realised. **Driver Training for Automated Vehicles: A Systems Approach** identifies the training requirements for drivers of AVs and takes a systematic approach to design, develop, implement and evaluate a comprehensive training package to address these requirements. This book explores how training can overcome the driver challenges associated with AVs by improving drivers' mental models, trust in automation, decisions and behaviour when activating a Level 4 AV. It presents a systematic approach to the training lifecycle by first presenting the current state of research into AVs, identifying the challenges and training requirements for drivers of AVs and then developing and evaluating a training programme to achieve these requirements. This fascinating title highlights the need for drivers to undergo training for AVs and takes us a step closer to this need. It walks readers through a systematic four-step process and provides practical guidance to develop and evaluate an effective training programme. The reader will develop a thorough understanding of the current driver challenges with AVs and the methods and systems to mitigate them through current knowledge and research. This book is an ideal read for practitioners, designers and academics with a professional or research interest in AVs. Its appeal extends to those in the fields of automotive design, Systems Engineering, Human Factors and education and training.

A Doomed Cat From The Start With 3 Chances To Live: A Manual On When Not To Have Kids Lionel Barrow, 2023-04-14. These are the life and times of Lionel Ricardo Barrow II. If it were up to me, I would have been dead on May 20, 2003. All I broke was my left elbow and right femur. The Lord still kept me alive and I kept writing. There were still things I needed to do and that is how I see it. Then my nephew stood me up and I got into a car accident that was not my fault at 3 AM on October 28, 2018, when I was two exits away from home. I broke my left leg and right ankle. The Lord still kept me alive and then I wrote this memoir. Even still, there is a lot more to the story. I am a doomed cat from the start that should have not been born and this is a manual on when not to have kids.

Cemeterians Jack W. Plunkett, 2008. Franklin Jack Marla Thadius and Caitlin, this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job, no really, we mean any bloody job. Money's a bit tight, right now. Trudge through disgusting sewers to battle manatee massacring mermaids and soggy cultists creep through creepy fog littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad Mad Scientist, a surly Necromancer, a Banshee's granddaughter and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other or at least quit fighting over the tele privilege schedule long enough to get the job done. Not likely.
