Helene Guldberg,2013-11-12 Today the belief that human beings are special is distinctly out of fashion Almost every day we are presented with new revelations about how animals are so much more like us than we ever imagined The argument is at its most powerful when it comes to our closest living relatives the great apes This book argues that whatever first impressions might tell us apes are really not just like us Science has provided strong evidence that the boundaries between us and other species are vast Unless we hold on to the belief in our exceptional abilities we will never be able to envision or build a better future in which case we might as well be monkeys **The Divine Economy** Paul Seabright,2025-10-07 Longlisted for the Financial Times and Schrodgers Business Book of the Year Award A novel economic interpretation of how religions have become so powerful in the modern world Religion in the twenty first century is alive and well across the world despite its apparent decline in North America and parts of Europe Vigorous competition between and within religious movements has led to their accumulating great power and wealth Religions in many traditions have honed their competitive strategies over thousands of years Today they are big business like businesses they must recruit raise funds disburse budgets manage facilities organize transportation motivate employees and get their message out In The Divine Economy economist Paul Seabright argues that religious movements are a special kind of business they are platforms bringing together communities of members who seek many different things from one another spiritual fulfilment friendship and marriage networks even business opportunities Their function as platforms he contends is what has allowed religions to consolidate and wield power This power can be used for good especially when religious movements provide their members with insurance against the shocks of modern life and a sense of worth in their communities It can also be used for harm political leaders often instrumentalize religious movements for authoritarian ends and religious leaders can exploit the trust of members to inflict sexual emotional financial or physical abuse or to provoke violence against outsiders Writing in a nonpartisan spirit Seabright uses insights from economics to show how religion and secular society can work together in a world where some people feel no need for religion but many continue to respond with enthusiasm to its call **Industrial Agriculture and Ape Conservation** Helga Rainer,Alison R. T. White,Arcus Foundation,Annette Lanjouw,2015-12-17 Presents new research and analysis along with case studies to examine the interface between ape conservation and industrial agriculture This title is available as Open Access Handbook of Child Psychology and Developmental Science, Cognitive Processes ,2015-04-06 The essential reference for human development theory updated and reconceptualized The Handbook of Child Psychology and Developmental Science a four volume reference is the field defining work to which all others are compared First published in 1946 and now in its Seventh Edition the Handbook has long been considered the definitive guide to the field of developmental science Volume 2 Cognitive Processes describes cognitive development as a relational phenomenon that can be studied only as part of a larger whole of the person

and context relational system that sustains it In this volume specific domains of cognitive development are contextualized with respect to biological processes and sociocultural contexts Furthermore key themes and issues e g the importance of symbolic systems and social understanding are threaded across multiple chapters although every each chapter is focused on a different domain within cognitive development Thus both within and across chapters the complexity and interconnectivity of cognitive development are well illuminated Learn about the inextricable intertwining of perceptual development motor development emotional development and brain development Understand the complexity of cognitive development without misleading simplification reducing cognitive development to its biological substrates or viewing it as a passive socialization process Discover how each portion of the developmental process contributes to subsequent cognitive development Examine the multiple processes such as categorizing reasoning thinking decision making and judgment that comprise cognition The scholarship within this volume and as well across the four volumes of this edition illustrate that developmental science is in the midst of a very exciting period There is a paradigm shift that involves increasingly greater understanding of how to describe explain and optimize the course of human life for diverse individuals living within diverse contexts This Handbook is the definitive reference for educators policy makers researchers students and practitioners in human development

Resident Evil is a multidimensional as well as multimedia universe Various books graphic novels games and movies the fifth one came out in 2012 all contribute to this enormous universe The new essays written for this volume focus on this particular zombie manifestation and its significance in popular culture The essayists come from very different fields so it was possible to cover a wide range and discuss numerous issues regarding this universe Among them are game theory the idea of silence as well as memory the connection to iconic stories such as Alice in Wonderland posthumanism and much more A lot of ground is covered that will facilitate further discussions not only among Resident Evil interested persons but also among other zombie universes and zombies in general Most of these essays focus on the female figure Alice a character revered by many as a feminist warrior *The Oxford Handbook of Comparative Evolutionary Psychology* Jennifer Vonk, Todd K.

Shackelford, 2012-02-13 This volume brings together leading experts in comparative and evolutionary psychology Top scholars summarize the histories and possible futures of their disciplines and the contribution of each to illuminating the evolutionary forces that give rise to unique abilities in distantly and closely related species *The Instruction of Imagination* Daniel Dor, 2015 The book presents a new general theory of language as a collectively constructed communication technology not unlike the social media on the Net today that is dedicated to a very particular communicative function the instruction of

imagination The theory re frames all the major questions in the linguistic sciences and opens the way towards the re unification of the field

All in the Mind? Peter Clarke,2015-05-15 Much progress has been made to understand the intricacies of the brain s workings Some have claimed and many assumed that these findings have challenged faith in God to the point of destruction Are we not mere neural machines Are religious experiences not just in the mind the products of abnormal brain events Is faith not just a side effect of evolution Not so according to neuroscientist Peter Clarke after a lifetime s study of the brain In this comprehensive book the current state of neuroscientific evidence is weighed up alongside ideas of what it means to be human the idea of the soul near death experiences and questions of free will and responsibility He engages with the leading thinkers in these areas including Francis Crick Richard Dawkins Daniel Dennett Sam Harris and Daniel Wegner

Evolutionary Processes in the Natural History of Religion Hansjörg Hemminger,2021-09-22 The study of religion by the humanities and social sciences has become receptive for an evolutionary perspective Some proposals model the evolution of religion in Darwinian terms or construct a synergy between biological and non Darwinian processes The results however have not yet become truly interdisciplinary The biological theory of evolution in form of the Extended Evolutionary Synthesis EES is only sparsely represented in theories published so far by scholars of religion Therefore this book reverses the line of view and asks how their results assort with evolutionary biology How can the subject area religion integrated into behavioral biology How is theory building affected by the asymmetry between the scarce empirical knowledge of prehistoric religion and the body of knowledge about extant and historic religions How does hominin evolution in general relate to the evolution of religion Are there evolutionary pre adaptations Subsequent versions of evolutionary biology from the original Darwinism to EES are used in interdisciplinary constructs Can they be integrated into a comprehensive theory The biological concept most often used is co evolution in form of a gene culture co evolution However the term denotes a process different from biological co evolution Important EES concepts do not appear in present models of religious evolution e g neutral evolution evolutionary drift evolutionary constraints etc How to include them into an interdisciplinary approach Does the cognitive science of religion CSR harmonize with behavioral biology and the brain sciences Religion as part of human culture is supported by a complex multi level behavioral system How can it be modeled scientifically The book addresses graduate students and researchers concerned about the scientific study of religion and biologist interested in interdisciplinary theory building in the field
