1 # This script implements a simple neural network (NN) with one hidden layer and one output layer.
2 # The NN is trained using the backpropagation algorithm.
3 # The input data is loaded from a file named 'input.txt'.
4 # The output data is loaded from a file named 'output.txt'.
5 # The NN is trained for a fixed number of epochs (1000).
6 # The training process is monitored by printing the loss and accuracy at each epoch.
7 # The final weights and biases are saved to a file named 'weights.txt'.
8 # The NN is then used to predict the output for a given input.

1  The digital world is a double-edged sword. On the one hand, it
2  has revolutionized communication, bringing people closer together
3  than ever before. On the other hand, it has also created a
4  landscape of cyber threats and privacy concerns.
5
6  In the realm of communication, digital technology has
7  transformed the way we interact. Email, instant messaging,
8  and video conferencing have become integral parts of our
9  daily lives. These tools have broken down geographical
10  barriers, allowing us to connect with friends and colleagues
11  across the globe in real-time.
12
13  However, the digital world is not without its dangers.
14  Cybercriminals are constantly seeking ways to exploit
15  vulnerabilities in our digital infrastructure. Phishing
16  attacks, identity theft, and data breaches are all too
17  common. The loss of sensitive information can have
18  devastating consequences for individuals and organizations
19  alike.
20
21  To navigate this complex digital landscape, we must
22  take proactive measures to protect our privacy and
23  security. This includes using strong passwords,
24  enabling two-factor authentication, and being vigilant
25  about the information we share online.
26
27  In conclusion, the digital world is a double-edged
28  sword. While it offers unprecedented opportunities for
29  communication and collaboration, it also presents
30  significant challenges. By staying informed and taking
31  appropriate precautions, we can harness the power of
32  digital technology while minimizing the risks.
