OVER EXCESSIVE AMBITION AS REFLECTED IN THREE SCIENCE FICTION NOVELS: FRANKENSTEIN, SOLARIS AND INFERNAL DEVICES KHULOD H. HUSAIN, 2021-08-05 This book attempts to explore the emergence of science fiction as a genre and its development into steampunk as a subgenre of science fiction in selected science fiction novels Mary Shelley's *Frankenstein* 1823 Stanislaw Lem's *Solaris* 1970 and K W Jeter's *Infernal Devices* 1987 This research shows that the scientists in these novels drag themselves into darkness Victor the protagonist of *Frankenstein* is an ambition scientist who wants to conquer death but tragically loses his family during this endeavor Kelvin the hero of *Solaris* is psychologically devastated when he struggles to understand how *Solaris* ocean creates a simulation of people The hero of the third novel George Dewar's father a mad scientist and inventor creates a double of his own son as a robot tries to destroy the earth The main argument of this research is that all these novels set in different eras draw on science fiction to criticize and question man's greedy and unrestricted desire for scientific discovery to the extent that they want to conquer the universe and play the role of God The study will ask the following questions How do the ambitious scientists in the novels drag themselves into madness And how does the scientific desire turn into a crave for transcendence bringing about their damnation What do these scientific explorations and inventions reveal about human nature Does steampunk bring evolution to the future as a sub genre of science fiction

Thinking about Life Paul S. Agutter, Denys N. Wheatley, 2008-11-05 Our previous book *About Life* concerned modern biology We used our present day understanding of cells to define the living state providing a basis for exploring several general interest topics the origin of life extraterrestrial life intelligence and the possibility that humans are unique The ideas we proposed in *About Life* were intended as starting points for debate we did not claim them as truth but the information on which they were based is currently accepted as scientific fact What does that mean What is scientific fact and why is it accepted What is science and is biology like other sciences such as physics except in subject matter The book you are now reading investigates these questions and some related ones Like *About Life* it may particularly interest a reader who wishes to change career to biology and its related subdisciplines In line with a recommendation by the British Association for the Advancement of Science that the public should be given fuller information about the nature of science we present the concepts underpinning biology and a survey of its historical and philosophical basis

The Dao of Healing

Lai Pak-Wah,2018-08-01 The last 50 years have seen the popularity of Chinese medicine grow exponentially In China Korea Japan and Singapore Chinese medicine has been incorporated into their healthcare systems to varying degrees In the West it is no longer uncommon for patients to consult Chinese medicine doctors many of whom are non Chinese However among Christians in many parts of the developed world Chinese medicine is still viewed with suspicion and negativity Are these fears justified How can we better understand the roots and practices of Chinese medicine The Dao of Healing takes us on an in depth exploration of the histories and philosophies that have shaped both Western biomedicine and Chinese medicine in order that we might make informed judgements about them If our call is to love our neighbours we need to be able to dialogue with them on the basis of mutual respect and understanding Let this book be the catalyst for meaningful and productive conversations across the divide The Substantial Philosophy John I.
