Strategic Information and Basic Laws IBP, Inc, **A Directory of Information Resources in the United States**, 1973

A Directory of Information Resources in the United States National Referral Center (U.S.), 1973 *Small and Medium-sized Enterprises in International Economic Law* Thilo Rensmann, 2017 International economic law with its traditional focus on large multinational enterprises is only slowly waking up to the new reality of small and medium sized enterprises SMEs In the wake of the digital revolution smaller companies now play an important role in the economic landscape In 2015 the UN expressly called for SMEs to have greater access to international trade and investment and it is increasingly recognized that the integration of SMEs provides one of the keys to creating a more sustainable and inclusive global economy As born global SMEs increasingly permeate transnational supply chains so interactions between these companies and legal policy makers proliferate *Small and Medium sized Enterprises in International Economic Law* offers the first comprehensive analysis of the interaction between SMEs and international economic law This book presents a broad international perspective gathering together contributions by leading experts from academia legal practice and international organizations It opens up a field of enquiry into this so far unexplored dynamic and provide a touchstone for future debate Diverse perspectives illuminate regional developments in particular within the EU such as State Aid and the implications of multinational free trade partnership agreements The analysis covers a broad spectrum of international trade and investment law focusing on issues of particular interest to SMEs such as trade in services government procurement and trade facilitation The essays also examine questions of legitimacy and conduct in the global marketplace in particular concerns surrounding the threat posed to the interests of domestic SMEs by the growing liberalization of international trade and investment These essays constitute essential reading for practitioners and academics seeking to navigate a previously neglected trend in international economic law **Good Faith in Long-Term Relational Supply Contracts in the Context of Hardship from A Comparative Perspective** Peng Guo, 2021-11-09 This book provides fair and acceptable solutions to hardship issues in long term relational supply contracts This book uses an approach to strike a balance between the traditional approach underlying classical contract law which emphasises the almost absolute prevalence of the principle of pacta sunt servanda

and a flexible approach that is based on the principle of *clausula rebus sic stantibus*. This book argues for an emerging principle of *pacta sunt servanda bona fide* on the basis of the relational contract theory. Additionally, this book demonstrates how good faith can serve as a foundation for imposing a duty to renegotiate on the parties. The aim of this book is rather to propose how relational contract theory can be applied to the analysis of specific legal rules in general. Lastly, this book highlights how the duty to renegotiate and the power to adapt a contract can be further developed upon the occurrence of hardship based on good faith and the relational nature and characteristics of a long term relational supply contract. This book explores and enriches the existing research on relational contract theory, concentrates primarily on its application in domestic contract laws, particularly in the regulation of long term contracts in American contract law. As an outcome, this book provides a more feasible and satisfactory approach for courts or arbitral tribunals to undertake when facing hardship issues in international contract disputes. Overall, hardship, long term relational supply contracts, and good faith are examined extensively.

Yearbook Maritime Law Ignacio Arroyo, 2013-04-18. The importance of legal questions related to the sea is obvious to everyone. It is hardly surprising that the subjects that make up international current events illustrate the leading role played by maritime affairs. Indeed, it is no coincidence that three quarters of the earth's surface is covered by oceans. Territorial seas, exclusive economic zones, exploitation of the seabed, fishing, transport, insurance, collision, and pollution raise many unresolved questions. On the other hand, the contrast of this importance with the modest attention that existing periodical publications merit must be underscored. Without undervaluing these publications, there has been a need for some time to create a vehicle of common expression based on three central tenets: interdisciplinary framework, tendency towards uniform law, and both a theoretical and practical approach. A framework of interdisciplinary nature seems to be relevant as it is desirable to overcome the artificial separation between public and private law.

Legal Aspects of Privately Financed Infrastructure Projects (PFIPs) in China Shuang Liang, 2020-08-01. This book discusses the reform and improvement of Chinese legislation on Privately Financed Infrastructure Projects (PFIPs), the goal being to help its implementation in China satisfy international standards. In this regard, current Chinese laws are found to be insufficient when it comes to reducing risks to PFIPs due to certain shortcomings. Therefore, the corresponding legislation must be reformed and improved. The Legislative Guide and Model Provisions drafted by UNCITRAL are discussed as the international standards that can effectively guide this reform. Other countries' laws on PFIPs provide supplementary reference material. Given the rapid rise in the use of PFIPs in China, this book offers a strong theoretical basis for improving Chinese legislation. It also provides general suggestions that can be applied to the reform of laws on PFIPs in any country.
