Imagining Imaging Michael R. Jackson, 2021-11-25 From Roentgen to Rembrandt Hounsfield to Hollywood and Vesalius to videogames *Imagining Imaging* explores the deeply entwined relationship between art and visual based culture and radiology medical imaging Including artworks from numerous historical eras representing varied geographic locations and visual traditions alongside a diverse range of contemporary artists Dr Jackson argues that the foundations of medical image construction and interpretation were laid down in artistic innovations dating back hundreds and thousands of years Since the discovery of X rays artists and moviemakers have in turn drawn rich inspiration from radiographic imagery and concepts but the process of cross pollination between art and science has continued with creative endeavour continuing to mould medical imaging examinations to this day Blending a unique mix of art science and medical history together with aspects of visual neurophysiology and psychology *Imagining Imaging* is essential reading for radiologists radiographers and artists alike Peppered with familiar TV and film references personal insights into the business of image interpretation and delivered in an accessible and humorous style the book will also appeal to anyone who enjoys looking at pictures Key features Engaging synthesis of art and medical history combined with anecdotes and experiences from a working clinical radiologist Diverse range of visual reference points including astronomy botany and cartography alongside comprehensive discussion of medical imaging modalities including plain radiography ultrasound CT and MRI 200 full colour illustrations [Single-Molecule](#)

Pro ASP.NET Web Forms Techniques Alex Homer, 2008-01-01 ASP.NET MAKES IT EASY to create interactive and intuitive interfaces for Web applications and attractive and exciting Web pages The server based postback architecture combined with the comprehensive array of server controls that are provided as part of the .NET Framework allow developers to quickly build browser based interfaces for Web sites and Web applications using much the same event driven approach as in traditional executable programs developed in languages like Visual Basic Delphi and C This is a completely new and different way of working from previous versions of ASP and the underlying principles and

workings of server based events which occur in response to actions made by the user in the page can prove to be difficult to gmsp in their entirety However constructing ASP NET pages especially with some of the tools that are available or under development now is very much easier and often less error prone than in classic ASP Besides a completely server based approach to user interaction does have its downsides In high latency scenarios or over slow network connections the need to hit the server every time the page content needs to be modified can intrude on the workings of an application or reduce the perceived responsiveness of a Web site
