Anderson, 1990

Mosby's Pathology for Massage Therapists - E-Book Susan G. Salvo, 2013-02-11 Written by a massage therapist for massage therapists *Mosby's Pathology for Massage Therapists* 3rd Edition provides direct information along with focused recommendations Coverage of over 340 pathologies helps you appropriately tailor massage treatment and more than 750 full color photographs and illustrations make it easier to recognize common pathologies This edition includes a new chapter on geriatric massage and has been extensively reviewed by over a dozen experts in the massage and medical fields Written by massage therapy educator and practitioner Susan Salvo this resource provides the pathology knowledge you need to succeed on licensure and certification exams and in practice A traffic light icon appears before each pathology in the book designating whether massage is contraindicated red local contraindication yellow or indicated green for that particular pathology Consistent format for each chapter makes it easy to find key information with learning objectives list of pathologies system overview and pathologies including description etiology signs and symptoms treatment and massage considerations Student friendly features in each chapter include learning objectives and self tests that measure your comprehension Medical Technology boxes highlight special populations such as clients in wheelchairs or with pacemakers and explain what the medical device is and what special precautions or contraindications you should be aware of before working on these clients Spotlight on Research boxes summarize recent studies of massage therapy and its effects Student resources on an Evolve companion website include interactive activities video clips of techniques animations the Body Spectrum coloring book flashcards review questions additional case studies an image collection an audio glossary study tips stress busting tips research updates and more *Mosby's Pathology for Massage Therapists* Online reinforces content covered in the book and provides a dynamic way to learn key concepts with features including recall activities rollover glossary terms and definitions animations quizzes and Clinical Tips boxes Available separately **Essentials of Anatomy and Physiology for Communication Disorders** John A. Seikel, David G. Drumright, Paula Seikel, 2004 Intended as an accessible easy to use anatomy and physiology book for introductory communication sciences courses and speech language pathology assistants It is accompanied by a CD ROM that provides users with additional information on the anatomy and physiology of the speech and hearing systems through interactive self study animations quizzes and more **Applied Neurosciences for the Allied**

Health Professions Douglas McBean, Frederike van Wijck, 2012-09-21 This brand new resource provides a solid comprehensive and accessible foundation in neurosciences for undergraduates and pre registration postgraduate students Using a multidisciplinary approach it will guide students in their understanding of the most commonly found problems in neurological rehabilitation and inform their clinical practice The book starts with the foundation of basic neurosciences covering the normal function and structure of the nervous system from the organism as a whole through to the molecular level It also introduces perceptuo motor control and learning topics that lie at the heart of rehabilitation The book then goes on to discuss problems that allied health professionals commonly encounter in neurological rehabilitation Topics covered include problems with perception and movement planning attention and memory communication motivation and emotion sleep continence and sexuality The book also introduces key theories and evidence underpinning both behavioural and pharmacotherapeutic interventions used in neurological rehabilitation The book closes by summarising current principles underpinning best practice and also looks to the future by identifying gaps in evidence based practice with ideas for future research and what the future may hold for neurological rehabilitation Throughout a variety of supplementary information boxes point towards additional material such as Case Studies which highlight the clinical relevance of topics discussed and a variety of Research Boxes which refer to more advanced material and or original research studies Each chapter ends with self assessment questions which will check progress and prompt students to reflect on how the information presented in the chapter could be applied to clinical practice Written by a multidisciplinary team highly experienced in teaching research and clinical practice Lays the foundation of basic neurosciences for allied health students Accessible and comprehensive text Introduces students to key theories and evidence underpinning neurological rehabilitation Focuses on clinically relevant information End of chapter self assessment questions of different levels of complexity

Applied Neuroscience for the Allied Health Professions Douglas McBean, Frederike van Wijck, 2012-08-11 This brand new resource provides a solid comprehensive and accessible foundation in neurosciences for undergraduates and pre registration postgraduate students Using a multidisciplinary approach it will guide students in their understanding of the most commonly found problems in neurological rehabilitation and inform their clinical practice The book starts with the foundation of basic neurosciences covering the normal function and structure of the nervous system from the organism as a whole through to the molecular level It also introduces perceptuo motor control and learning topics that lie at the heart of rehabilitation The book then goes on to discuss problems that allied health professionals commonly encounter in neurological rehabilitation Topics covered include problems with perception and movement planning attention and memory communication motivation and emotion sleep continence and sexuality The book also introduces key theories and evidence underpinning both behavioural and pharmacotherapeutic interventions used in neurological rehabilitation The book closes by summarising current principles underpinning best practice and also looks to the future by identifying gaps in evidence based practice with ideas for future

research and what the future may hold for neurological rehabilitation Throughout a variety of supplementary information boxes point towards additional material such as Case Studies which highlight the clinical relevance of topics discussed and a variety of Research Boxes which refer to more advanced material and or original research studies Each chapter ends with self assessment questions which will check progress and prompt students to reflect on how the information presented in the chapter could be applied to clinical practice Written by a multidisciplinary team highly experienced in teaching research and clinical practice Lays the foundation of basic neurosciences for allied health students Accessible and comprehensive text Introduces students to key theories and evidence underpinning neurological rehabilitation Focuses on clinically relevant information End of chapter self assessment questions of different levels of complexity

Mosby's Essential Sciences for Therapeutic Massage - E-Book Sandy Fritz, 2012-04-16 The fourth edition of this science essentials text for massage students features new full color photos and illustrations along with an easy to read conversational style that explains A P concepts clearly The book not only helps students learn the information they need to pass certification exams but it also helps them see how scientific content applies to actual practice This new edition also features a very enhanced Evolve resource package along with new material on boosting your knowledge of nutrition and research two subjects of growing interest in the massage therapy profession Clinical reasoning activities included in the workbook section for each chapter promote problem based learning Format combining workbook and textbook features gives you immediate review tools in the form of matching exercises short answer questions fill in the blank questions drawing exercises and critical thinking questions Sections on pathologic conditions feature intervention protocols as well as indications and contraindications for therapeutic massage Expert author Sandy Fritz provides credibility and authority to the information presented Practical Applications boxes in each chapter enable you to see the way material applies to real practice and supports competency based learning Highly illustrated format features over 700 full color line drawings and photos Updated chapters and artwork have all been revised to reflect the most current industry information and reviewer feedback MTBOK mapping for instructors on the Evolve website includes a mapping document that links the student objectives in the book to the components of the MTBOK New muscle illustrations in Chapter 9 clearly show attachments and actions as well as the relationships between different muscles in composite drawings Coverage of nutrition now in Chapter 12 includes information on the digestive process basics of solid nutrition how vitamins and minerals affect the body and how proper nutrition affects the functions of all systems of the body Enhanced pathology and indications contraindications appendix includes more illustrations to increase your understanding of what you may encounter during practice Improved biomechanics chapter activities that use photos instead of drawings help you better understand and apply gait assessment and muscle testing concepts

Sensation and Perception Margaret W. Matlin, 1988 This book sets the standard in bringing technical scientific information on the subject of sensation and perception to a wide audience with outstanding readability and thorough coverage Retaining its traditionally clear and

accessible writing style this new edition boasts a thoroughly revised art program and over 1 300 new references The motion chapter now focuses solely on visual motion perception so it appears earlier in the book In addition the book includes thirteen In Depth sections each of which explore a current hot research topic to provide a sense of how researchers ask questions with subjects varying from the role of face recognition in eyewitness testimony to phantom limb perception
