biochemistry of isoprenoids and sterols function of isoprenoids and sterols structure and function of lipids biosynthesis of complex lipids fatty acid oxygenases and desaturases medium and long chain fatty acids interaction of university government and industrial research algal lipids and genetics and biotechnology In addition to these sessions of plenary lectures there were four poster sessions in which about 140 posters were presented All of this was packed into four days and there was some comment about the scarcity of time to ask questions of the speakers discuss the posters and even to eat lunch The compression of the program was a result of the continued desire of the organizing committees to avoid concurrent sessions The congregation of participants into a single session increases interaction and generates a feeling of unity at these symposia
